Comparative Contract Law

*The International Library of Comparative Law /
Elgar Research Collection*

Edited by **John O. Haley** and **William R. Orthwein**

As cross-border transactions expand in our contemporary global economy, the significance of comparative contract law is evermore apparent. In addition the role of lawyers in transactional counselling as well as dispute resolution has become increasingly prominent. Appreciation of the principal similarities and differences between the two major subdivisions of Common Law—the United States and the British Commonwealth—and Civil Law—French versus German law—has thus become imperative. Together with an original introduction by the editor this compilation of classic key papers by leading scholars endeavours to facilitate such appreciation and will prove an essential reference point for students, researchers and policymakers.

Nazi Law: From Nuremberg to Nuremberg

Edited by **John J. Michalczyk**

The book looks at how, after assuming power in 1933, the Nazi Party manipulated the legal system and the constitution in its crusade against Communists, Jews, homosexuals, as well as Jehovah's Witnesses and other religious and racial minorities, resulting in World War II and the Holocaust. It then goes on to analyse how the law was subsequently used by the opponents of Nazism in the wake of World War Two to punish them in the war crime trials at Nuremberg.

288 pages 2017:11 Bloomsbury Academic

Hardback 9781474276108 £85.00

However, historical understanding of these developments remains limited. How has marriage come to be the target of national legislation? Are recent policies on same-sex marriage part of a broader transformation? And, has marriage come to be similar across the globe despite claims about national, cultural and religious difference?

Policy Drift: Shared Powers and the Making of U.S. Law and Policy

By **Norma M. Riccucci**

In *Policy Drift*, Norma Riccucci sheds light on how institutional forces collectively contributed to major change in three key areas of U.S. policy (privacy rights, civil rights, and climate policy) without any new policy explicitly being written. Formal levers of change—U.S. Supreme Court decisions; inaction by Congress; Presidential executive orders—stimulated by social, political or economic forces, organized permutations which ultimately shaped and defined contemporary public policy.

アメリカの正義 2017年: 危機下の最高裁

American Justice 2017: Supreme Court in Crisis

Robinson, Kimberly

With the death of associate justice Antonin Scalia, the Supreme Court was plunged into crisis. Refusing to hold hearings or confirm the nominee of a Democratic president almost a year away from a presidential election, the Republican-controlled Senate held the court hostage, forcing it to do its work through nearly the entire term ending in June 2017 with just eight justices. In *American Justice 2017: The Supreme Court in Crisis*, Kimberly Robinson examines the way individual justices and the institution as a whole reacted to this unprecedented, politically fraught situation

The book surveys the historical development as well as the contemporary contexts of Islamic law. In distilling the history of Islamic law for non-specialists, the author covers important topics such as the development and transformation of Islamic institutions before and after colonialism. Readers will learn about rituals, dietary restrictions, family, contracts and property, lawful and unlawful gain, criminal law and punishments, and what makes a government legitimate in the eyes of Muslim individuals and authorities.

How to Do Things with International Law

By Ian Hurd

Conventionally understood as a set of limits on state behavior, the "rule of law" in world politics is widely assumed to serve as a progressive contribution to a just, stable, and predictable world. In *How to Do Things with International Law*, Ian Hurd challenges this received wisdom. Bringing the study of law and legality together with power, politics, and legitimation, he illustrates the complex politics of the international rule of law.

Critical Concepts in Law

Edited by **Mark Harris** and **Denise Ferreira da Silva**

Postcolonialism and the Law provides a long overdue delineation of the field of enquiry that engages with the legal programmes, structures, and procedures which have sustained Euro-North American supremacy on the international political stage for the past fifty years or so. Focusing on the relationship between law and the racial and colonial mechanisms of subjugation at work in the global present, the contributions assembled in this new four-volume collection from Routledge's *Critical Concepts in Law* series attend to juridical apparatuses as they operate in concert with economic and ethical frameworks, procedures, and architectures.
