Health Care Policy in East Asia: A World Scientific Reference 4 volume set

World Scientific Series in Global Health Economics and Public Policy, 6

Edited by **Teh-wei Hu**, *et al.*

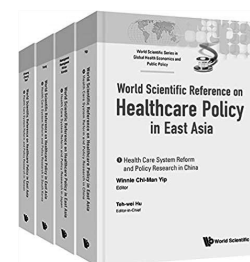

This four-volume reference set is designed to help health care professionals, academics, policymakers, and general readers gain a good grasp of the background and latest developments in the health care systems of China, Japan, South Korea, and Taiwan. This reference set provides an in-depth comparative health policy analysis and discussion of health care reform strategies in each of these systems. One unique feature of this set is that each volume has been edited by a leading scholar who has been deeply involved in the development of the health care system in that particular region.

ワールドサイエンティフィック版アジア太平洋貿易政策レファレンス 全2巻

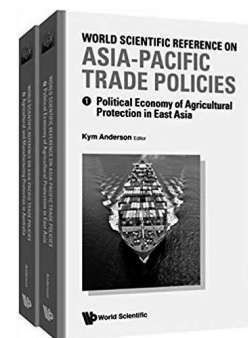

World Scientific Reference on Asia-Pacific Trade Policies 2 volume set

Edited by **Kym Anderson**

This two-volume reference work provides a timely update on how far the region has come in opening markets. It analyses the motivations or ostensible objectives of policies adopted in the past, the changing extent of the domestic price distortions involved, the economic effects of those policies at home and abroad, the political economy forces at work that brought about those policies and their subsequent reform, their consequences for international trade, economic welfare and poverty alleviation, and prospects for sustainable improvements in current policies.

240 pages June 2019 Agenda Publishing

Hardback	9781788210089	£60.00
Paperback	9781788210096	£16.99

This new title in the *World Economies* series explains the development of the Indian economy since independence and partition. The book explores the debates around India's trajectory that have linked its varied history to the domination in policy-making of the interests of the industrial bourgeoisie, rich farmers and white-collar workers. The book uses case studies of poverty and inequality, of education, health, work and gender issues to outline the human story behind the economic figures and performance indicators. The factors that have made India unique, such as its internal geography and languages, the significance of the service sector, the "democratic paradox of public service delivery" are explored in detail.

日本経済

The Japanese Economy

World Economies

By **Hiroaki Richard Watanabe**

Hiroaki Richard Watanabe examines the ups and downs of Japan's postwar economic history to offer an up-to-date and authoritative guide to the workings of Japan's economy. He highlights the country's distinct modes of business network and Japan's state-market relationship. He explores the characteristic institutional complementarity that exists among different sectors and business practices and gives particular attention to human factors, such as labour market dualism (inequality between regular and non-regular workers), gender discrimination and migration not to mention the disturbing phenomenon of *karoshi* (death by overwork). Although often associated in Western minds with futuristic automated efficiency Watanabe shows that Japan's economy retains many inefficient practices that do not comply with global standards and which exhibit a longer history of economic nationalism and the legacy of a developmental state.

The Size of Government: Measurement, Methodology and Official Statistics

(Austrian Economics)

256 pages September 2019 Agenda Publishing

Hardback 9781788210102 £60.00

Vaclav Rybacek examines how studies have used national accounts and officially published statistics to invariably underestimate the size of government, which has led to erroneous economic policy recommendations and ultimately to an unrealistic assessment of a government's ability to meet its debts. The author shows how the methodology of macroeconomic statistics has failed to keep pace with the expansion of government and has misallocated, for example, many public producers in the field of financial services, to the corporate sector.

Gender and Finance

(The Gendered Economy)

160 pages August 2019 Agenda Publishing

Paperback 9781788211024 £25.00

In this important study, Brigitte Young focuses our attention on the gendered implication of financial governance, financialization, monetary policy and financial crisis. She demonstrates that the silence of women in finance reinforces, or restructures, the social and material organization of gender relations that prevail at different times and places.

アマルティア・セン

Amartya Sen

Key Contemporary Thinkers

By **Lawrence Hamilton**

This book offers a much-needed introduction to Amartya Sen's extraordinary variety of ideas. Lawrence Hamilton provides an excellent, accessible guide to the full range of Sen's writings, contextualizing his ideas and summarizing the associated debates. In elegant prose, Hamilton reconstructs Sen's critiques of the major philosophies of his time, assesses his now famous concern for capabilities as an alternative for thinking about poverty, inequality, gender discrimination, development, democracy and justice, and unearths some overlooked gems.

カルロス・スリム：世界一の富豪の権力・金・道義
**Carlos Slim: The Power, Money, and
Morality of One of the World's Richest Men**

By **Diego Osorno**

The biography of Carlos Slim, one of the richest people of all time, is not just the tale of the first man from a developing country to ever reach the top of the Forbes list of billionaires. It is the story of a character who represents the neoliberal mentality of our times, who mistrusts politicians, believes that the market is the most efficient mechanism for everything (even to combat corruption), and sees philanthropy as a social investment with businesses as the exclusive form of collective wealth.

In this compelling narrative of capitalist development and revolutionary response, Jessica M. Kim reexamines the rise of Los Angeles from a small town to a global city against the backdrop of the U.S.-Mexico borderlands, Gilded Age economics, and American empire. It is a far-reaching transnational history, chronicling how Los Angeles boosters transformed the borderlands through urban and imperial capitalism at the end of the nineteenth century and how the Mexican Revolution redefined those same capitalist networks into the twentieth.

Kieran Maguire looks at the different ways in which professional football operates as a business—how clubs make their money, or more commonly, lose it. In particular he analyses how success is measured by the different and often competing stakeholders in football clubs—owners, managers, fans, players, commercial partners and the media. Throughout, he draws on a range of case studies using the finances of professional clubs in the UK and overseas to show how the traditional profit based approach of limited companies applies to football.

----------	---------------	---------

The International Economics of Wine provides a broad range of studies by Professor Kym Anderson and his co-authors of the international trade dimension of national, regional and global wine market developments over the past quarter-century. Prior to 1990, barely 10% of global wine production crossed national borders, but now that figure is 40%. In that short period, wine has switched from being one of the world's least-traded agricultural products to one of the most traded internationally. This has created an unprecedented boom for consumers, who have also witnessed huge improvements in the quality and diversity of wines available.

The Political Economy of Central Banking: Contested Control and the Power of Finance, Selected Essays of Gerald Epstein

592 pages August 2019 Edward Elgar

Hardback 9781788978408 £135.00

Written over several decades by Gerald Epstein and co-authors, these works explore why central banks do what they do, and how they could better operate. Epstein shows that central banks are a contested terrain over which major economic and political groups fight for control; and demonstrates that though in the US and most other countries, private bankers have the upper-hand in this political struggle, they don't always win.

The Power of Finance: Financialization and the Real Economy

320 pages September 2019 Agenda Publishing

Hardback 9781911116950 £25.00

The Power of Finance explores the pervasive forms that financialization has taken, its rise as a global phenomenon, its impact on economic growth, its transformative effect on businesses and the costs that we pay as consumers. Malcolm Sawyer, a leading authority on financialization, gives an unrivalled overview of the development of financialization, its impact, and its role both as an enabler and as a driver of inequality. He asks whether finance has become a burden to growth and what, if anything, can be done to tame and control its power.

This volume incorporates important surveys from a historical perspective. The masterly survey of Bhagwati provides great intuition about trade theoretical results and Chipman's three surveys present the mathematics of trade theory. These are very deep surveys from a mathematical point of view and show, for example, the Ricardian model as an application of Quasi-Concave programming and also the magnificent use of Sperner's Lemma for the odd and even intersections that occur in some problems in trade theory.

Hardback	9781509529162	US\$45.00
Paperback	9781509529179	US\$12.95

States claim the right to control the natural resources within their territory. Liberals argue for a system of private ownership rights, including over natural resources, while egalitarians dispute such claims and argue for equal rights to natural resources. Moore shows why these standard approaches to resource justice are wanting, and offers an original approach that examines the different ways in which people interact with resources in order to determine what good is at stake in any particular case.

Hardback	9781509531196	US\$64.95
Paperback	9781509531202	US\$19.95

In this book, Jonathan Symons offers a qualified defence of the ecomodernist vision. Ecomodernism, he explains, is neither as radical or reactionary as its critics claim, but belongs in the social democratic tradition, promoting a third way between laissez-faire and anti-capitalism. Critiquing and extending ecomodernist ideas, Symons argues that states should defend against climate threats through transformative investments in technological innovation.

Paperback 9781788210058 £15.00

The "gig economy" is a relatively recent term coined to describe a range of working arrangements that have previously been denoted as precarious, flexible and contingent. Borrowed from musicians, a "gig" describes a one-night performance, but in the context of general employment, it covers the self-employed who work for hire, those on temporary, short-term contracts and on zero-hours contracts. In this concise overview, Alex de Ruyter and Martyn Brown explain the key facets of the gig economy and explore the dangers and potential it affords.

The Challenges of Self-Employment in Europe: Status, Social Protection and Collective Representation

256 pages May 2019 Edward Elgar

Hardback 9781788118446 £90.00

Presenting the results of a wide-reaching European survey, this book highlights key issues being faced across Europe: the implementation of universal social protection schemes; active labour market policies to support sustainable self-employment and the renewal of social dialogue through bottom-up organisations to extend the collective representation of self-employed professionals. With its theoretically-informed, empirical and interdisciplinary comparative analysis, this book identifies and explains key strategies to resolve these challenges.

国際的才能管理研究ハンドブック

Research Handbook of International Talent Management

Research Handbooks in Business and Management Series

Edited by **Yipeng Liu**

International talent management has become a critically important topic for scholarly discussion, in policy debates, and among the business community. Despite this, however, research into talent management tends to lack theoretical underpinnings, especially from an international, multidisciplinary and comparative perspective. This *Research Handbook* fills this gap, bringing together a range of leading researchers, scholars, and thinkers to debate and advance the conceptualization and understanding of this multifaceted subject.

Research Handbook on the Economics of Intellectual Property Law 2 volume set

Research Handbooks in Law and Economics

Edited by **Peter S. Menell** and **Ben Depooter**

Volume 1 explores the role that economic incentives play in promoting innovation and creativity. It also examines the analogy between intellectual property and tangible property, the economics of intellectual property institutions, and the interplay of intellectual property, development, and international trade.

Volume 2 explores analytical methods used to study intellectual property law. The chapters survey data sources, the use of patent citation data, patent valuation, empirical studies of intellectual property modalities (patent, copyright, trademark, and trade secrets) and institutions, the impacts of technological change on technology and content industries, the use of experimental methods, economic history research, political economy, and knowledge commons research.
