## Literature: A World History. 4 vols

Damrosch, David et al. (ed.)

(Wiley-Blackwell)

2022 : 06 1761 p. Hardback 9780470671900 US\$750.00

*Literature: A World History* encompasses all the world's major literary traditions, emphasizing the interrelationship of local and national cultures over time. Spanning global literature from the beginnings of recorded history to the present day, this expansive four-volume set examines the many varieties of the world's literatures in their social and intellectual contexts. Its four volumes are devoted to literature before 200 CE, from 200 to 1500, from 1500 to 1800, and from 1800 to 2000, with four dozen contributors providing new insights into the art of literature and address the situation of literature in the world today. Organized throughout six broad regions - Africa, the Americas, East Asia, Europe, South and Southeast Asia and Oceania, and West and Central Asia - *Literature: A World History* offers readers a clear and consistent treatment of diverse forms of literary expression across time and place. Throughout the text, particular emphasis is placed on literary institutions within different regional and linguistic cultures and on the relations between literature and a spectrum of social, political, and religious contexts.

## A Clear Dawn: New Asian Voices from Aotearoa New Zealand

Morris, Paula & Wong, Alison (ed.)

(Auckland U.P.)

2022 : 03 352 p. Hardback 9781869409470 US\$49.99

This landmark collection of poetry, fiction and essays by emerging writers is the first-ever anthology of Asian New Zealand creative writing. *A Clear Dawn* presents an extraordinary new wave of creative talent. With roots stretching from Indonesia to Japan, from China to the Philippines to the Indian subcontinent, the authors in this anthology range from high school students to retirees, from recent immigrants to writers whose families have lived in New Zealand for generations. Some of the writers - including Gregory Kan, Sharon Lam, Rose Lu and Chris Tse - have published books; some, like Mustaq Missouri, Aiwa Pooamorn and Gemishka Chetty, are better known for their work in theatre and performance. For many, *A Clear Dawn* is their first-ever print publication.

シェイクスピアの作品が疑義のある *The Passionate Pilgrim* と *A Lover's Complaint* も収録

Developed in partnership with the Royal Shakespeare Company, this Complete Works of William Shakespeare combines exemplary textual scholarship with beautiful design. Curated by expert editors Sir Jonathan Bate and Professor Eric Rasmussen, the text in this collection is based on the iconic 1623 First Folio: the first and original Complete Works lovingly assembled by Shakespeare's fellow actors, and the version of Shakespeare's text preferred by many actors and directors today. This stunning revised edition goes further to present Shakespeare's plays as they were originally intended - as living theatre to be enjoyed and performed on stage. Along with new colour photographs from a vibrant range of RSC productions, a new Stage Notes feature documenting the staging choices in 100 RSC productions showcases the myriad ways in which Shakespeare's plays can be brought to life.

### The Secrets of Words

Chomsky, Noam & Moro, Andrea

(MIT Pr.)

2022 : 05 96 p. Hardback 9780262046718 US\$17.95

In *The Secrets of Words*, influential linguist Noam Chomsky and his longtime colleague Andrea Moro have a wide-ranging conversation, touching on such topics as language and linguistics, the history of science, and the relation between language and the brain. Moro draws Chomsky out on today's misplaced euphoria about artificial intelligence (Chomsky sees "lots of hype and propaganda" coming from Silicon Valley), the study of the brain (Chomsky points out that findings from brain studies in the 1950s never made it into that era's psychology), and language acquisition by children. Chomsky in turn invites Moro to describe his own experiments, which proved that there exist impossible languages for the brain, languages that show surprising properties and reveal unexpected secrets of the human mind.

Miyagawa, Shigeru

*Linguistic Inquiry Monographs* (MIT Pr.)

2022 : 05 272 p. Paperback 9780262543491 US\$50.00

In *Syntax in the Treetops*, Shigeru Miyagawa proposes that syntax extends into the domain of discourse by making linkages between core syntax and the conversational participants. Miyagawa draws on evidence for this extended syntactic structure from a wide variety of languages, including Basque, Japanese, Italian, Magahi, Newari, Romanian, and Spanish, as well as the language of children with autism. His proposal for what happens at the highest level of the tree structure used by linguists to represent the hierarchical relationships within sentences - "in the treetops" - offers a unique contribution to the new area of study sometimes known as "syntacticization of discourse."

Yaguello, Marina & Butler, Erik

(MIT Pr.)

2022 : 04 360 p. Hardback 9780262046398 US\$29.95

In *Imaginary Languages*, Marina Yaguello explores the history and practice of inventing languages, from religious speaking in tongues to politically utopian schemes of universality to the discoveries of modern linguistics. She looks for imagined languages that are autonomous systems, complete unto themselves and meant for communal use; imaginary, and therefore unlike both natural languages and historically attested languages; and products of an individual effort to lay hold of language. Inventors of languages, Yaguello writes, are madly in love: they love an object that belongs to them only to the extent that they also share it with a community.

**Antiquarians of Nineteenth-Century Japan - The Archaeology of Things in the Late Tokugawa and Early Meiji Periods**

(Getty Publications)

2022 : 03 256 p. 4 color and 25 b/w, 2 tables Hardback 9781606067420 US\$60.00

Originally published in Japanese, *Antiquarians of Nineteenth-Century Japan* looks at the approach toward object-based research across the late Tokugawa and early Meiji periods, which were typically kept separate, and elucidates the intellectual continuities between these eras. Focusing on the top-down effects of the professionalizing of academia in the political landscape of Meiji Japan, which had advanced by attacking earlier modes of scholarship by antiquarians, Suzuki shows how those outside the government responded, retracted, or challenged new public rules and values. He explores the changing process of evaluating objects from the past in tandem with the attitudes and practices of antiquarians during the period of Japan's rapid modernization. He shows their roots in the intellectual sphere of the late Tokugawa period while also detailing how they adapted to the new era. Suzuki also demonstrates that Japan's antiquarians had much in common with those from Europe and the United States.

Newly minted research economists are equipped with a PhD's worth of technical and scientific expertise but often lack some of the practical tools necessary for "doing economics." With this book, economics professor Marc Bellemare breaks down the components of doing research economics and examines each in turn: communicating your research findings in a paper; presenting your findings to other researchers by giving a talk; submitting your paper to a peer-reviewed journal; funding your research program through grants (necessary more often than not for all social scientists); knowing what kind of professional service opportunities to pursue; and advising PhD, master's, and undergraduate students.

Moser, Thomas & Savioz, Marcel

(MIT Pr.)

2022 : 03 464 p. Hardback 9780262046916 US\$50.00

Monetarism emerged in the 1950s and 1960s as a school of economic thought that questioned certain tenets of Keynesianism. Emphasizing the monetary nature of inflation and the responsibility of central banks for price stability, monetarism held sway in the inflation-plagued 1970s, but saw its influence begin to decline in the 1980s. Although Milton Friedman is the economist most closely associated with the development of monetarism, it was Karl Brunner (1916-1989) who introduced the term into the current vocabulary of economics and shaped its meaning. In this volume, leading economists - many of them Brunner's friends and former colleagues - consider the influence of Brunner's monetarism on current debates over monetary policy.

This graduate-level text on microeconomics, covering such topics as decision theory, game theory, bargaining theory, contract theory, trade under asymmetric information, and relational contract theory, is unique in its emphasis on the interplay between theory and evidence. It reviews the microeconomic theory of exchange “from the ground up,” aiming to produce a set of models and hypotheses amenable to empirical exploration, with particular focus on models that are useful for the study of contracts, institutions, and organizations. It explores research that extends price theory to the exchange of commodities when markets are incomplete, discussing recent developments in the field..

Asia has shown the world what success in economic development looks like. From the amazing transformations of Japan, the Republic of Korea, and the other ‘tigers’ in the early 70s, to the more recent takeoffs of the People’s Republic of China (PRC), India, and the leading economies in Southeast Asia, the region has prospered at a startling pace. Technologies were adopted, productivity raised, and export markets conquered. Billions were lifted out of poverty. What was once a backwater is now a global engine of growth.

This volume offers a comprehensive, integrated treatment of financial economics, tracking the major milestones in the field and providing methodological tools. Doing so, it balances theoretical explanations, empirical evidence, and practical relevance. It illustrates nearly a century of theoretical advances with a vast array of models, showing how real phenomena (and, at times, market practice) have helped economists reformulate existing theories. Throughout, the book offers examples and solved problems that help readers understand the main lessons conveyed by the models analyzed. The book provides a unique and authoritative reference for the field of financial economics.

Iskenderian, Mary Ellen

(MIT Pr.)

2022 : 04 200 p. Hardback 9780262046442 US\$29.95

Iskenderian, who leads a nonprofit that works to give women access to the financial system, argues that the banking industry should view these one billion "unbanked" women not as charity cases but as a business opportunity: a lucrative new market of small business owners, heads of households, and purchasers of financial products and services. Iskenderian shows how financial inclusion can be transformative for the lives of women in developing countries, describing, among other things, the informal moneylenders and savings clubs that women have relied on, the need for both financial and digital literacy (and access) as mobile phones become a means of banking, and the importance of women's property rights.

This book represents a pioneering interdisciplinary effort to analyse Asian civil society under authoritarianism, a regime type that is re-appearing or deepening after several decades of increased political liberalisation. By organising its approach into four main themes, this volume succinctly reveals the challenges facing civil society in authoritarian regimes, including: actions under political repression; transitions to democracy; uncivil society; political capture and legal control. It features in-depth analyses of a variety of Asian nations, from 'hard' authoritarian regimes, like China, to 'electoral' authoritarian regimes, like Cambodia whilst also addressing countries experiencing democratic regression, such as the Philippines.

(World Scientific)

2022 : 05 276 p. Hardback 9789811244414 ¥14,500

This book brings together contributions from leading authors in a range of fields related to Japan and the United Kingdom. Adopting a comparative perspective, it tackles topics ranging from the politics of opposition, democracy, immigration and citizenship, to education, sportsmanship and popular culture, as well as issues of immigration and identity. Each chapter presents and clarifies the differences, similarities and exchanges between the two countries to emphasise that, though little exists in isolation in this global age, in-depth knowledge of particular regions remains vital. This book argues for a deeper understanding of the UK and Japan in pursuit of hope, and casts a reflection on the self and one's own sense of place and identity. It will be an invaluable resource for anyone interested in cross-cultural theory and comparisons between Japan and the United Kingdom.

2022 : 07 168 p. Hardback 9781032283128 £120.00 Paperback 9781032283135 £34.99

Rozman argues that triangles present a convincing answer to the question of whether we are entering a new era of bipolarity like the Cold War, or an age of multipolarity. Triangulation emerged as a dynamic in East Asia in the aftermath of the Cold War, but has been accelerated in the wake of the Xi and Trump administrations. Even as Sino-US competition and confrontation deepens, triangles have a substantial presence. East Asian triangles share an unusual mixture of three distinct elements: deep-seated security distrust; extraordinary economic interdependence; and a combustible composition of historical resentments and civilizational confidence. The combination of the three makes the case for triangularity more compelling, Rozman argues.

Findlay, Trevor

*Belfer Center Studies in International Security* (MIT Pr.)

2022 : 06 288 p. Paperback 9780262543736 US\$30.00

In *Transforming Nuclear Safeguards Culture*, Trevor Findlay investigates the role that organizational culture may play in preventing the spread of nuclear weapons, examining particularly how it affects the nuclear safeguards system of the International Atomic Energy Agency (IAEA), the paramount global organization in the non-proliferation field. Findlay seeks to identify how organizational culture may have contributed to the IAEA's failure to detect Iraq's attempts to acquire illicit nuclear capabilities in the decade prior to the 1990 Gulf War and how the agency has sought to change safeguards culture since then. In doing so, he addresses an important piece of the nuclear nonproliferation puzzle: how to ensure that a robust international safeguards system, in perpetuity, might keep non-nuclear states from acquiring such weapons.

This is the most up-to-date and comprehensive volume on the international relations of Asia and the Indo-Pacific. The Asian region has become the fulcrum of international relations globally - it is the most economically vibrant, geostrategically significant, socially and culturally diverse, and militarily dangerous region in the world. The world's leading great powers - the United States and China - jockey for primacy and vie for influence throughout the region, while "middle powers" - India, Indonesia, Japan, and South Korea - are extending their regional reach. The ten-member Association of Southeast Asian Nations (ASEAN) is collectively important in its own right, but has also become the epicenter of US-China regional competition.

Heinze, Eric

(MIT Pr.)

2022 : 04 184 p. Hardback 9780262046459 US\$27.95

What are human rights? Are they laid out definitively in the UN's Universal Declaration of Human Rights or the US Bill of Rights? Are they items on a checklist - dignity, justice, progress, standard of living, health care, housing? In *The Most Human Right*, Eric Heinze explains why global human rights systems have failed. International organizations constantly report on how governments manage human goods, such as fair trials, humane conditions of detention, healthcare, or housing. But to appease autocratic regimes, experts have ignored the primacy of free speech. Heinze argues that goods become rights only when citizens can claim them publicly and fearlessly: free speech is the fundamental right, without which the very concept of a "right" makes no sense.

*The Open Casebook Series* (MIT Pr.)

2022 : 03 688 p. Paperback 9780262543873 US\$65.00

This book, which can be used as a primary text for a first-year law school torts course, maps the progression of the law of torts through the language and example of public judicial decisions in a range of cases. Taken together, these cases show differing approaches to the problems of defining legal harm and applying those definitions to a messy world. The cases range from alleged assault and battery by "The Schoolboy Kicker" (1891) to the liability of General Motors for "The Crumpling Toe Plate" (1993). Each case is an artifact of its time; students can compare the judges' societal perceptions and moral compasses to those of the current era.

*A Companion to Public Philosophy* brings together in a single volume the diverse practices, modalities, and perspectives of this rapidly growing field. Forty-two chapters written by established practitioners and newer voices alike consider questions ranging from the definition of public philosophy to the value of public philosophy to both society and philosophy itself. Throughout the book, philosophers offer insights into the different publics they have engaged, the topics they have explored, the methods they have used and the lessons they have learned from these engagements.

### A Century of Development in Taiwan: From Colony to Modern State

Chow, Peter C.Y. (ed.)

(Edward Elgar)

2022 : 01 400 p. Hardback 9781800880153 £120.00

Foreword: 若林 正文 (早稲田大学名誉教授)

In 1921, Taiwanese intellectuals initiated a Petition Movement for the Establishment of a Taiwanese Parliament under the colonial government. Leaders of the enlightenment also established the Taiwan Cultural Association (TCA) on October 17, 1921. These two movements led to a series of socio-cultural, political, and economic developments during the past century. This book addresses the path and trajectory of the emergence of Taiwan from a colony to a modern state in the past century. It contains four major sections on identity and political developments and explores international relations, economic development, educational and societal development, and culture and literature development.

### War and Trade in Maritime East Asia

Oka, Mihoko (ed.)

*Palgrave Studies in Comparative Global History* (Palgrave Macmillan)

2022 : 04 272 p. Hardback 9789811673689 EUR109.99

This book is divided into two parts. One is the state of trade in East Asia before and after the collapse of the tributary system to the Ming Dynasty, and the other is the war of aggression in which Toyotomi Hideyoshi of Japan sent a large number of troops to the Korean Peninsula with a view of conquering China at the end of the sixteenth century. With regard to East Asia in the sixteenth and seventeenth centuries, the contributors in this book share a problem awareness in terms of using trade and war as subjects to clarify multi-ethnic, borderless, and multilayered situations. Although there are many chapters related to Japan, this book tries to grasp the interaction between Japan as a region of East Asia and neighboring countries from a global perspective, not the one singular national history.

### Neurolinguistics

Baggio, Giosue

*The MIT Press Essential Knowledge series* (MIT Pr.)

2022 : 05 240 p. Paperback 9780262543262 US\$15.95

Neurolinguistics, the study of language in the brain, describes the anatomical structures (networks of neurons in the brain) and physiological processes (ways for these networks to be active) that allow humans to learn and use one or more languages. It draws on neuroscience, linguistics - particularly theoretical linguistics - and other disciplines. In this volume in the MIT Press Essential Knowledge series, Giosue Baggio offers an accessible introduction to the fundamentals of neurolinguistics, covering language processing, language acquisition, literacy, and speech and language disorders.

### Star Power: ITER and the International Quest for Fusion Energy

Becoulet, Alain & Butler, Erik

(MIT Pr.)

2022 : 03 192 p. Hardback 9780262046268 US\$28.95

Nuclear fusion research tells us that the Sun uses one gram of hydrogen to make as much energy as can be obtained by burning eight tons of petroleum. If nuclear fusion - the process that makes the stars shine - could be domesticated for commercial energy production, the world would gain an inexhaustible source of energy that neither depletes natural resources nor produces greenhouse gases. In *Star Power*, Alain Becoulet offers a concise and accessible primer on fusion energy, explaining the science and technology of nuclear fusion and describing the massive international scientific effort to achieve commercially viable fusion energy.

### Mastering Quantum Mechanics: Essentials, Theory, and Applications

Zwiebach, Barton

(MIT Pr.)

2022 : 04 1200 p. Hardback 9780262046138 US\$110.00

This undergraduate textbook offers a comprehensive overview of quantum mechanics, beginning with essential concepts and results, proceeding through the theoretical foundations that provide the field's conceptual framework, and concluding with the tools and applications students will need for advanced studies and for research. Drawn from lectures created for MIT undergraduates and for the popular MITx online course, "Mastering Quantum Mechanics," the text presents the material in a modern and approachable manner while still including the traditional topics necessary for a well-rounded understanding of the subject. As the book progresses, the treatment gradually increases in difficulty, matching students' increasingly sophisticated understanding of the material.

### Four Shades of Gray: The Amazon Kindle Platform

Rowberry, Simon

*Platform Studies* (MIT Pr.)

2022 : 03 272 p. Paperback 9780262543507 US\$35.00

*Four Shades of Gray* offers the first book-length analysis of Amazon's Kindle and its impact on publishing. Simon Peter Rowberry recounts how Amazon built the infrastructure for a new generation of digital publications, then considers the consequences of having a single company control the direction of the publishing industry. Exploring the platform from the perspectives of technology, texts, and uses, he shows how the Kindle challenges traditional notions of platforms as discrete entities. He argues that Amazon's influence extends beyond "disruptive technology" to embed itself in all aspects of the publishing trade; yet despite industry pushback, he says, the Kindle has had a positive influence on publishing.

### Introduction to Algorithms. 4th ed

Cormen, Thomas H. & Leiserson, Charles E.

(MIT Pr.)

2022 : 04 1332 p. Hardback 9780262046305 US\$135.00

Some books on algorithms are rigorous but incomplete; others cover masses of material but lack rigor. *Introduction to Algorithms* uniquely combines rigor and comprehensiveness. It covers a broad range of algorithms in depth, yet makes their design and analysis accessible to all levels of readers, with self-contained chapters and algorithms in pseudocode. Since the publication of the first edition, *Introduction to Algorithms* has become the leading algorithms text in universities worldwide as well as the standard reference for professionals. This fourth edition has been updated throughout, with new chapters on matchings in bipartite graphs, online algorithms, and machine learning, and new material on such topics as solving recurrence equations, hash tables, potential functions, and suffix arrays.

### Probabilistic Machine Learning: An Introduction

Murphy, Kevin P.

*Adaptive Computation and Machine Learning series* (MIT Pr.)

2022 : 03 944 p. Hardback 9780262046824 US\$110.00

*Probabilistic Machine Learning* grew out of the author's 2012 book, *Machine Learning: A Probabilistic Perspective*. More than just a simple update, this is a completely new book that reflects the dramatic developments in the field since 2012, most notably deep learning. In addition, the new book is accompanied by online Python code, using libraries such as scikit-learn, JAX, PyTorch, and Tensorflow, which can be used to reproduce nearly all the figures; this code can be run inside a web browser using cloud-based notebooks, and provides a practical complement to the theoretical topics discussed in the book. This introductory text will be followed by a sequel that covers more advanced topics, taking the same probabilistic approach.

### Structure and Interpretation of Computer Programs: JavaScript edition

Abelson, Harold & Sussman, Gerald Jay

*MIT Electrical Engineering and Computer Science* (MIT Pr.)

2022 : 04 400 p. Paperback 9780262543231 US\$55.00

Since the publication of its first edition in 1984 and its second edition in 1996, *Structure and Interpretation of Computer Programs (SICP)* has influenced computer science curricula around the world. Widely adopted as a textbook, the book has its origins in a popular entry-level computer science course taught by Harold Abelson and Gerald Jay Sussman at MIT. SICP introduces the reader to central ideas of computation by establishing a series of mental models for computation. Earlier editions used the programming language Scheme in their program examples. This edition has been adapted to JavaScript.
