### Japan and American Children's Books: A Journey

Jagusch, Sybille

(Rutgers U.P.)

2021 : 06 350 p. Hardback 9781978822870 US\$120.00 Paperback 9781978822627 US\$49.95

This volume takes readers on a journey through nearly 200 years of American children's books depicting Japanese culture, starting with the illustrated journal of a boy who accompanied Commodore Matthew Perry on his historic voyage in the 1850s. Along the way, it traces the important role that representations of Japan played in the evolution of children's literature, including the early works of Edward Stratemeyer, who went on to create such iconic characters as Nancy Drew. It also considers how American children's books about Japan have gradually become more realistic with more Japanese-American authors entering the field, and with texts grappling with such serious subjects as internment camps and the bombing of Hiroshima and Nagasaki.

### On Revision: The Only Writing That Counts

Germano, William

*Chicago Guides to Writing, Editing, and Publishing* (Univ. of Chicago Pr.)

2021 : 10 208 p. Hardback 9780226410517 ¥6,120 Paperback 9780226410654 ¥2,720

For more than twenty years, thousands of writers have turned to Germano for his insider's take on navigating the world of publishing. A professor, author, and veteran of the book industry, Germano knows what editors want and what writers need to know: Revising is not just correcting typos. Revising is about listening and seeing again. Revising is a rethinking of the principles from the ground up to understand why the writer is doing something, why they're going somewhere, and why they're taking the reader along with them. *On Revision* steps back to take in the big picture, showing authors how to hear their own writing voice and how to reread their work as if they didn't write it. *On Revision* will show you how to know when your writing is actually done - and, until it is, what you need to do to get it there.

### Verbal Art and Systemic Functional Linguistics

Miller, Donna R

*Key Concepts in Systemic Functional Linguistics* (Equinox)

2021 : 10 224 p. Paperback 9781781795347 £24.95

This book provides an overview of the dialectic of theory and practice through which SFL positions itself as an applicable linguistics with reference to the theory of Verbal Art. A concise history of the linguistic study of literature tout court is sketched, as well as the roots of specifically SFL approaches to it. A detailed theoretical description is given of the emergence of systemic functional stylistics and, in particular, of the overall architecture of Systemic Socio-Semantic Stylistics (SSS), the central descriptive-analytical model created by Ruqaiya Hasan. Subsequently, the correspondences between Hasan's framework and what Jakobson theorized as the empirical linguistic evidence of his 'poetic function', grammatical parallelism and with what he calls 'pervasive parallelism', are delineated and illustrated via the analysis of one poem by D.H. Lawrence, 'Bei Hennef' (1913). Further, the teaching of the language in literature with the tools of SFL/SSS is addressed, and a case study of the experience of guiding students towards this 'special' register awareness in an undergraduate EFL curriculum in Bologna, Italy is offered.

2021 : 04 248 p. Hardback 9780228006756 US\$34.95

In *Games of Discontent* Harry Blutstein presents vivid accounts of threatened boycotts to protest racism in the United States, South Africa, and Rhodesia. He describes demonstrations by Czechoslovak gold medal gymnast Vera Cáslovská against the Soviet-led invasion of her country. The most dramatic moment of the Olympic Games was Tommie Smith and John Carlos's black power salute from the podium. Blutstein furnishes new details behind their protest and examines how this iconic image seared itself into historical memory, inspiring Colin Kaepernick and a new generation of athlete-activists to take a knee against racism decades later. The 1968 Summer Games became a microcosm of the discord happening around the globe. Describing a range of protest activities preceding and surrounding the 1968 Olympics, *Games of Discontent* shines light on the world during a politically transformative moment when discontents were able, for the first time, to globalize their protests.

2021 : 06 288 p. 160 color photos. Hardback 9780819580269 US\$35.00

On March 11, 2011 one of the most powerful earthquakes in recorded history devastated Japan, triggering a massive tsunami and nuclear meltdowns at three reactors in the Fukushima Daiichi Nuclear Power Plant complex in a triple disaster known as 3.11. On five separate journeys, Japanese-born performer and dancer Eiko Otake and historian and photographer William Johnston visited multiple locations across Fukushima, creating 200 transformative color photographs that document the irradiated landscape, accentuated by Eiko's poses depicting both the sorrow and dignity of the land. The book also includes essays and commentary reflecting on art, disaster, and grief.

*Economic Analysis and Infrastructure Investment* explores the links between infrastructure investment and economic outcomes, analyzing key economic issues in the funding and management of infrastructure projects. It includes new research on the short-run stimulus effects of infrastructure spending, develops new estimates of the stock of US infrastructure capital, and explores incentive aspects of public-private partnerships with particular attention to their allocation of risk. The volume provides a reference for researchers seeking to study infrastructure issues and for policymakers tasked with determining the appropriate level and allocation of infrastructure spending.

### Economics of Research and Innovation in Agriculture

Moser, Petra (ed.)

NBER Conference Report (Univ. of Chicago Pr.)

2021 : 10 304 p. Hardback 9780226779058 ¥18,360

Dwindling public support leaves universities, which historically have been a major source of agricultural innovation, increasingly dependent on industry funding, with uncertain effects on the nature and direction of agricultural research. All of these factors create an urgent need for systematic empirical evidence on the forces that drive research and innovation in agriculture. This book aims to provide such evidence through economic analyses of the sources of agricultural innovation, the challenges of measuring agricultural productivity, the role of universities and their interactions with industry, and emerging mechanisms that can fund agricultural R&D.

In *Speculative Communities*, Aris Komporozos-Athanasiou examines the ways that speculation has moved beyond financial markets to shape fundamental aspects of our social and political lives. As ordinary people make exceptional decisions, such as the American election of a populist demagogue or the British vote to leave the European Union, they are moving from time-honored and -tested practices of governance, toward the speculative promise of a new, more uncertain future. This book shows how even our methods of building community have shifted to the speculative realm as social media platforms enable and amplify our volatile wagers.

### Racial Resentment in the Political Mind

Davis, Darren W. & Wilson, David C.

(Univ. of Chicago Pr.)

2021 : 10 320 p. Hardback 9780226814674 ¥14,280 Paperback 9780226814841 ¥4,420

The culprits, as many White people see it, are undeserving people of color, who are perceived to benefit unfairly from, and take advantage of, resources that come at Whites' expense - a worldview in which any attempt at modest change is seen as a challenge to the status quo and privilege. Yet, as Davis and Wilson reveal, many Whites have become racially resentful due to their perceptions that African Americans skirt the "rules of the game" and violate traditional values by taking advantage of unearned resources. Resulting attempts at racial progress lead Whites to respond in ways that retain their social advantage - opposing ameliorative policies, minority candidates, and other advancement on racial progress. Because racial resentment is rooted in beliefs about justice, fairness, and deservingness, ordinary citizens, who may not harbor racist motivations, may wind up in the same political position as racists, but for different reasons.

### Sludge: What Stops Us from Getting Things Done and What to Do about it

Sunstein, Cass R.

(MIT Pr.)

2021 : 09 136 p. Hardback 9780262045780 US\$24.95

We've all had to fight our way through administrative sludge - filling out complicated online forms, mailing in paperwork, standing in line at the motor vehicle registry. This kind of red tape is a nuisance, but, as Cass Sunstein shows in *Sludge*, it can also impair health, reduce growth, entrench poverty, and exacerbate inequality. Confronted by sludge, people just give up - and lose a promised outcome: a visa, a job, a permit, an educational opportunity, necessary medical help. In this lively and entertaining look at the terribleness of sludge, Sunstein explains what we can do to reduce it.

### **A Troubled Birth: The 1930s and American Public Opinion**

Herbst, Susan

*Chicago Studies in American Politics* (Univ. of Chicago Pr.)

2021 : 10 296 p. Hardback 9780226812915 ¥14,280 Paperback 9780226813103 ¥4,760

Herbst contends that the idea that there was a public - whose opinions mattered - emerged during the Great Depression, with the diffusion of radio, the devastating impact of the economic collapse on so many people, the appearance of professional pollsters, and Franklin Roosevelt's powerful rhetoric. She argues that public opinion about issues can only be seen as a messy mixture of culture, politics, and economics - in short, all the things that influence how people live. Herbst deftly pins down contours of public opinion in new ways and explores what endures and what doesn't in the extraordinarily troubled, polarized, and hyper-mediated present. Before we can ask the most important questions about public opinion in American democracy today, we must reckon yet again with the politics and culture of the 1930s.

### **Diversity's Child: People of Color and the Politics of Identity**

2021 : 08 232 p. Hardback 9780226799766 ¥12,920 Paperback 9780226800134 ¥4,080

Efrén O. Pérez deftly argues that America's changing demographics are forging a new identity for many as people of color - that unifies the political outlook of assorted minority groups. Drawing on opinion surveys of multiple minority groups, social science experiments with minority adults, content analyses of newspapers and congressional archives, and in-depth interviews with minority individuals, Pérez makes two key points. First, a person of color's identity does exist, and we can reliably measure it, as well as distinguish it from other identities that minorities hold. Second, across a wide swath of circumstances, identifying as a person of color profoundly shapes how minorities view themselves and their political system. *Diversity's Child* is a vital and engaging look at America's identity politics as well as at how people of color think about racial disparities and how politics can best solve them.

2021 : 12 128 p. Hardback 9780226815602 ¥12,920 Paperback 9780226815626 ¥2,450

In *Democracy in the Time of Coronavirus*, leading political thinker Danielle Allen untangles the US government's COVID-19 victories and failures to offer a plan for creating a more resilient democratic polity - one that can better respond to both the present pandemic and future crises. Looking to history, Allen also identifies the challenges faced by democracies in other times that required strong government action. In an analysis spanning from ancient Greece to the Reconstruction Amendments and the present day, Allen argues for the relative effectiveness of collaborative federalism over authoritarian compulsion and for the unifying power of a common cause. But for democracy to endure, we - as participatory citizens - must commit to that cause: a just and equal social contract and support for good governance.

### **Making Constituencies: Representation as Mobilization in Mass Democracy**

Disch, Lisa Jane

(Univ. of Chicago Pr.)

2021 : 10 200 p. Hardback 9780226804330 ¥13,260 Paperback 9780226804507 ¥4,420

Since the turn of the twenty-first century, the idea of a divided United States has become commonplace. In the wake of the 2020 election, some commentators warned that the American public was the most divided it has been since the Civil War. Yet, manipulation of voters is not as grave a threat to democracy in America as many scholars and pundits make it out to be. The greater threat comes from a picture that partisans use to rally their supporters: that of an America sorted into opposing camps so deeply rooted that they cannot be shaken loose and remade. *Making Constituencies* proposes a new theory of representation as mobilization to argue that divisions like these are not inherent in society, but created, and political representatives of all kinds forge and deploy them to cultivate constituencies.

**Modern Isonomy: Democratic Participation and Human Rights Protection as a System of Equal Rights**

Stourzh, Gerald / Peck-Kubaczek, Cynthia (trans.)

(Univ. of Chicago Pr.)

2021 : 11 192 p. Hardback 9780226811628 ¥12,920 Paperback 9780226811932 ¥3,740

The ideal, Stourzh argues, is a state, and indeed a world, in which individual rights, including the right to participate in politics equally, are clearly defined and possessed by all. Stourzh begins with ancient Greek thought contrasting isonomy - which is associated with the rule of the many - with "gradated societies," oligarchies, and monarchies. He then discusses the American experiment with the development of representative democracy as well as the French Revolution, which proclaimed that all people are born and remain free and with equal rights. But progress on the creation and protection of rights for all has been uneven. Stourzh discusses specifically the equalization of slaves, peasants, women, Jews, and indigenous people. He demonstrates how deeply intertwined the protection of equal rights is with the development of democracy and gives particular attention to the development of constitutional adjudication, notably the constitutional complaint of individuals.

Watson, Tara & Thompson, Kalee

(Univ. of Chicago Pr.)

2021 : 12 304 p. Hardback 9780226270227 ¥3,740

At once enlightening and devastating, *The Border Within* examines the costs and ends of America's interior enforcement - the policies and agencies, including ICE, aimed at removing immigrants already living in the country. Economist Tara Watson and journalist Kalee Thompson pair rigorous analysis with deeply personal stories from immigrants and their families to assess immigration's effects on every aspect of American life, from the labor force to social welfare programs to tax revenue. What emerges is a critical, utterly complete examination of what non-native Americans bring to the country, including immigration's tendency to elevate the wages and skills of those who are native-born.

2021 : 09 368 p. Hardback 9780226797663 ¥14,280 Paperback 9780226797830 ¥4,760

The emergence of the modern presidency in the first half of the twentieth century transformed the American government. But surprisingly, presidents were not the primary driving force of this change - Congress was. Through a series of statutes, lawmakers endorsed presidential leadership in the legislative process and augmented the chief executive's organizational capacities. But why did Congress grant presidents this power? In *Power Shifts*, John A. Dearborn shows that legislators acted on the idea that the president was the best representative of the national interest. Congress subordinated its own claims to stand as the nation's primary representative institution and designed reforms that assumed the president was the superior steward of all the people. In the process, Congress recast the nation's chief executive as its chief representative.

Just before the summer of 1982, French philosopher Michel Foucault gave a series of lectures at Victoria University in Toronto. In these lectures, which were part of his project of writing a genealogy of the modern subject, he is concerned with the care and cultivation of the self, a theme that becomes central to the second, third, and fourth volumes of his *History of Sexuality*. Throughout his career, Foucault had always been interested in the question of how constellations of knowledge and power produce and shape subjects, and in the last phase of his life, he became especially interested not only in how subjects are formed by these forces, but in how they ethically constitute themselves.

2021 : 11 352 p. Hardback 9780226789118 ¥14,280 Paperback 9780226801735 ¥4,760

In *The Buddha's Tooth*, John S. Strong examines Western stories, from the sixteenth to the twentieth century, surrounding two significant Sri Lankan sacred objects to illuminate and concretize colonial attitudes toward Asian religions. First, he analyzes a tale about the Portuguese capture and public destruction, in the mid-sixteenth century, of a tooth later identified as a relic of the Buddha. Second, he switches gears to look at the nineteenth-century saga of British dealings with another tooth relic of the Buddha - the famous *Daḷadā* enshrined in a temple in Kandy - from 1815, when it was taken over by English forces, to 1954, when it was visited by Queen Elizabeth II. As Strong reveals, the stories of both the Portuguese tooth and the Kandyan tooth reflect nascent and developing Western understandings of Buddhism, realizations of the cosmopolitan nature of the tooth, and tensions between secular and religious interests.

Lucassen, Jan

(Yale U.P.)

2021 : 07 544 p. Hardback 9780300256796 US\$35.00

Jan Lucassen provides an inclusive history of humanity's busy labor throughout the ages. Spanning China, India, Africa, the Americas, and Europe, Lucassen looks at the ways in which humanity organizes work: in the household, the tribe, the city, and the state. He examines how labor is split between men, women, and children; the watershed moment of the invention of money; the collective action of workers; and at the impact of migration, slavery, and the idea of leisure. From peasant farmers in the first agrarian societies to the precarious existence of today's gig workers, this surprising account of both cooperation and subordination at work throws essential light on the opportunities we face today.

In the turbulent period following the First World War the young Count Richard Coudenhove-Kalergi founded the Pan-European Union, offering a vision of peaceful, democratic unity for Europe, with no borders, a common currency, and a single passport. His political congresses in Vienna, Berlin, and Basel attracted thousands from the intelligentsia and the cultural elite, including Albert Einstein, Thomas Mann, and Sigmund Freud, who wanted a United States of Europe brought together by consent. The Count's commitment to this cooperative ideal infuriated Adolf Hitler, who referred to him as a "cosmopolitan bastard" in *Mein Kampf*.

2021 : 07 320 p. Hardback 9780367900823 £120.00 Paperback 9780367469481 £34.99

Through the window of locality, it enhances an understanding of broader political and socio-economic shifts in Japan. This includes demographic change, electoral and administrative reform, rural decline and revitalization, welfare reform, as well as the growing metabolic rift in energy and food production. Chapters throughout this edited volume discuss the different and often contested ways in which locality in Japan has been reconstituted, from historical and contemporary instances of administrative restructuring, to more subtle social processes of making - and unmaking - local places. Contributions from multiple disciplinary perspectives are included to investigate the tensions between overlapping and often incongruent dimensions of locality. Framed by a theoretical discussion of socio-spatial thinking, such issues surrounding the construction and renegotiation of local places are not only relevant for Japan specialists, but also connected with topical scholarly debates further afield.

*Routledge Worlds* (Routledge)

2021 : 09 1144 p. Hardback 9781138936850 £250.00

In its early modern period, under the Tokugawa shoguns, Japan was a world apart. For over two centuries the shogun's subjects were forbidden to travel abroad and few outsiders were admitted. Yet in this period, Japan evolved as a nascent capitalist society that could rapidly adjust to its incorporation into the world system after its forced "opening" in the 1850s. *The Tokugawa World* demonstrates how Japan's early modern society took shape and evolved: a world of low and high cultures, comic books and Confucian academies, soba restaurants and imperial music recitals, rigid enforcement of social hierarchy yet also ongoing resistance to class oppression. A world of outcasts, puppeteers, herbal doctors, samurai officials, businesswomen, scientists, scholars, blind lutenists, peasant rebels, tea-masters, sumo wrestlers, and wage workers.

In *Sound Alignments*, a transnational group of scholars explores the myriad forms of popular music that circulated across Asia during the Cold War. Challenging the conventional alignments and periodizations of Western cultural histories of the Cold War, they trace the routes of popular music, examining how it took on new meanings and significance as it traveled across Asia, from India to Indonesia, Hong Kong to South Korea, China to Japan. From studies of how popular musical styles from the Americas and Europe were adapted to meet local exigencies to how socialist-bloc and nonaligned Cold War organizations facilitated the circulation of popular music throughout the region, the contributors outline how music forged and challenged alliances, revolutions, and countercultures.

**American Exceptionalism: A New History of an Old Idea**

Tyrrell, Ian

(Univ. of Chicago Pr.)

2021 : 10 288 p. Hardback 9780226812090 ¥4,760

The notion that American identity might be exceptional emerged, Tyrrell shows, from the belief that the nascent early republic was not simply a postcolonial state but a genuinely new experiment in an imperialist world dominated by Britain. Prior to the Civil War, American exceptionalism fostered declarations of cultural, economic, and spatial independence. As the country grew in population and size, becoming a major player in the global order, its exceptionalist beliefs came more and more into focus - and into question. Over time, a political divide emerged: those who believed that America's exceptionalism was the basis of its virtue and those who saw America as either a long way from perfect or actually fully unexceptional, and thus subject to universal demands for justice. Tyrrell masterfully articulates the many forces that made American exceptionalism such a divisive and definitional concept.

They are not merely uninformed - they are misinformed. They cite cherry-picked evidence, rely on fake experts, and believe conspiracy theories. How can we convince such people otherwise? How can we get them to change their minds and accept the facts when they don't believe in facts? In this book, Lee McIntyre shows that anyone can fight back against science deniers, and argues that it's important to do so. Science denial can kill.

There's a lot of hype about robots; some of it is scary and some of it utopian. In this accessible book, two robotics experts reveal the truth about what robots can and can't do, how they work, and what we can reasonably expect their future capabilities to be. It will not only make you think differently about the capabilities of robots; it will make you think differently about the capabilities of humans.

**Statistical Methods for Reliability Data. 2nd ed**

Meeker, William Q. et al.

*Wiley Series in Probability and Statistics (Wiley)*

2021 : 11 672 p. Hardback 9781118115459 US\$135.00

*Statistical Methods for Reliability Data, Second Edition (SMRD2)* is an essential guide to the most widely used and recently developed statistical methods for reliability data analysis and reliability test planning. Written by three experts in the area, SMRD2 updates and extends the long-established statistical techniques and shows how to apply powerful graphical, numerical, and simulation-based methods to a range of applications in reliability. SMRD2 is a comprehensive resource that describes maximum likelihood and Bayesian methods for solving practical problems that arise in product reliability and similar areas of application. This text illustrates methods with numerous applications and all the data sets are available on the book's website. Also, SMRD2 contains an extensive collection of exercises that will enhance its use as a course textbook.

**Carbon Technocracy: Energy Regimes in Modern East Asia**

Seow, Victor

*Studies of the Weatherhead East Asian Institute (Univ. of Chicago Pr.)*

2021 : 10 384 p. Hardback 9780226721996 ¥6,120

In *Carbon Technocracy*, Victor Seow uses the remarkable story of the Fushun colliery to chart how the fossil fuel economy emerged in tandem with the rise of the modern technocratic state. Taking coal as an essential feedstock of national wealth and power, Chinese and Japanese bureaucrats, engineers, and industrialists pursued intensive energy extraction and deployed new technologies like open-pit mining and hydraulic stowage to maximize their hauls. At the same time, as much as these mine operators idealized the might of the machine and the fossil fuels that drove it, their extractive efforts nevertheless relied heavily on human labor. Under the carbon energy regime, countless workers here and elsewhere would be subjected to both the productivist demands of states and markets and the dangers of an increasingly exploited earth.
