The Lost Books of Jane Austen

Barchas, Janine

(Johns Hopkins U.P.)

2019 : 10 304 p. Hardback 9781421431598 US\$35.00

In the nineteenth century, inexpensive editions of Jane Austen's novels targeted to Britain's working classes were sold at railway stations, traded for soap wrappers, and awarded as school prizes. Packed with nearly 100 full-color photographs of dazzling, sometimes gaudy, sometimes tasteless covers, *The Lost Books of Jane Austen* is a unique history of these rare and forgotten Austen volumes. Such shoddy editions, Janine Barchas argues, were instrumental in bringing Austen's work and reputation before the general public. Only by examining them can we grasp the chaotic range of Austen's popular reach among working-class readers.

Systemic Functional Linguistics: Part 1, Volume 1

Matthiessen, Christian / Slade, Diana & Teruya, Kazuhiro (ed.)

Collected Works of Christian M.I.M. Matthiessen (Equinox)

2020 : 02 320 p. Hardback 9781781797082 £75.00

Volume 1 provides the foundation for the whole series of collected works, and includes chapters that serve as introduction of and summaries of Systemic Functional Linguistics. It is concerned with the nature of Systemic Functional Linguistics as theory, as framework and as a school of linguistics. It includes an overview of the organization or "architecture" of language according to SFL and of the lexicogrammatical subsystem of language, and of Halliday's conception of language as a resource for making meaning. It is also concerned with the history and development of SFL.

When News Travels East: Translation Practices by Japanese Newspapers

Matsushita, Kayo

Translation, Interpreting and Transfer, 1 (Leuven U.P.)

2019 : 11 208 p. Paperback 9789462701946 EUR39.50

International news stories provided to the public basically rely on translation. Most of this translation is done not by translators, but by journalists with practically no training in translation. What happens when the norms of journalism and those of translation clash? In this book, the author, a trained conference interpreter and former international journalist, investigates translator decisions in the practice of Japanese news translation. Her extensive analysis of texts from six major Japanese newspapers and interviews with Japanese "journalators" focuses on direct quotations, where accuracy is a journalistic priority but can generate loss of communication impact if implemented rigidly.

Approaches to Systemic Functional Grammar: Convergence and Divergence

Tucker, Gordon et al. (ed.)

(Equinox)

2020 : 02 320 p. Hardback 9781781796863 £75.00 Paperback 9781781796870 £22.95

This volume brings together contributions to a key area of interest within the framework of systemic functional linguistics: the role of meaning in the lexicogrammar. A key figure in the debate on this role is Robin Fawcett who has long argued for a fully semantic lexicogrammar where the relevant systems are seen as representing 'choices between meanings'. This volume, a festschrift in honour of Fawcett's long-standing contribution to the field, raises important questions related to lexicogrammatical meaning within systemic functional linguistics by examining the meaning-form interface, lexicogrammatical meaning in theme and transitivity, as well as lexis, intonation and its role in computational models.

Performing the Politics of Translation in Modern Japan: Staging the Resistance

Quinn, Aragorn

Routledge Studies in the Modern History of Asia (Routledge)

2019 : 12 208 p. Hardback 9780367192402 £120.00

Grounded in the aftermath of the Meiji Restoration in 1868 and analysing its legacy on stage, this book tells the story of the crucial role that performance and specifically embodied memory played in the changing understanding of the imported Western concepts of "liberty" (*jiyū*) and "revolution" (*kakumei*). Tracing the role of the post-Restoration movement itself as an important touchstone for later performances, it examines two key moments of political crisis. The first of these is the Proletarian Theatre Movement of the 1920s and 30s, in which the post-Restoration years were important for theorizing the Japanese communist revolution. The second is in the postwar years when Rights Movement theatre and thought again featured as a vehicle for understanding the present through the past.

Tokyo Listening examines how the sensory experience of the city informs how people listen to both music and everyday, ubiquitous sounds. Drawing on recent scholarship in the fields of sound studies, anthropology, and ethnomusicology and over fifteen years of ethnographic fieldwork in Japan, Lorraine Plourde traces the linkages between sound and urban space. She examines listening cultures via four main ethnographic sites in Tokyo—an experimental music venue, classical music cafes, office workspaces, and department stores—looking specifically at how such auditory sensibilities are cultivated.

Bloomsbury Visual Arts (Bloomsbury Academic)

2019 : 10 576 p. 28 b/w & 32 colour illus. Hardback 9781350036475 £195.00

The Encyclopedia of East Asian Design is the first comprehensive publication to focus on East Asian design and its histories. Although definitions of design in Asia are multiple, fluid and historically contingent, the disparate cultures within this vast landmass have long produced arts and crafts, interior, graphic, and design objects for domestic, regional, and global consumption. The encyclopedia provides in-depth, critically informed coverage of these practices, products, and the interpretive issues pertaining to them. The work is organised by country to reflect specific regional and national histories and geographies. Within these geographies, traditions, histories, theories and practices as well as key issues in modern and contemporary design are considered. The topics covered in these volumes range from ceramics and textiles, interior and architectural design, to environmental and sustainable design.

Manga from the Floating World: Comicbook Culture and the Kibyoshi of Edo Japan. 2nd ed

Manga from the Floating World is the first full-length study in English of the kibyōshi, a genre of woodblock-printed comic book widely read in late-eighteenth-century Japan. By combining analysis of the socioeconomic and historical milieus in which the genre was produced and consumed with three annotated translations of works by major author-artist Santō Kyōden (1761-1816) that closely reproduce the experience of encountering the originals, Adam Kern offers a sustained close reading of the vibrant popular imagination of the mid-Edo period. The kibyōshi, Kern argues, became an influential form of political satire that seemed poised to transform the uniquely Edoesque brand of urban commoner culture into something more, perhaps even a national culture, until the shogunal government intervened.

Traditionally viewed as an abstraction, the quantitative nature of money is essential in evaluating the relationship between monetary systems and society. *Money Counts* moves beyond abstraction, exploring the conceptual diversity and everyday enactment of money's quantity. Drawing from case studies including British jewelers, blood money payments in Germanic law codes, and the quotidian use of money in cosmopolitan Moscow, a Western Kenyan village, and socialist Havana, the chapters in this volume offer new theoretical and empirical interpretations of money's quantitative nature as it relates to abstraction, sociality, materiality, freedom, and morality.

In the wake of the hottest years on record, only robust measures to curb greenhouse gases promise relief from more frequent and intense storms, droughts, flooding, wildfires, and famines. Robert Frank describes how the strongest predictor of our willingness to support climate-friendly policies, install solar panels, or buy an electric car is the number of people we know who have already done so. In the face of stakes that could not be higher, the book explains how we could redirect trillions of dollars annually in support of carbon-free energy sources, all without requiring painful sacrifices from anyone.

While economic research emphasizes the importance of governmental institutions for growth and progress, conventional public policy textbooks tend to focus on macroeconomic policies and on tax-and-spend decisions. *Markets, State, and People* stresses the basics of welfare economics and the interplay between individual and collective choices. It fills a gap by showing how economic theory relates to current policy questions, with a look at incentives, institutions, and efficiency. How should resources in society be allocated for the most economically efficient outcomes, and how does this sit with society's sense of fairness?

Narrative Economics: How Stories Go Viral and Drive Major Economic Events

Shiller, Robert J.

(Princeton U.P.)

2019 : 10 384 p. Hardback 9780691182292 ¥3,720

In a world in which internet troll farms attempt to influence foreign elections, can we afford to ignore the power of viral stories to affect economies? In this groundbreaking book, Nobel Prize-winning economist and *New York Times* bestselling author Robert Shiller offers a new way to think about the economy and economic change. Using a rich array of historical examples and data, Shiller argues that studying popular stories that affect individual and collective economic behavior - what he calls "narrative economics" - has the potential to vastly improve our ability to predict, prepare for, and lessen the damage of financial crises, recessions, depressions, and other major economic events.

Spread through the public in the form of popular stories, ideas can go viral and move markets - whether it's the belief that tech stocks can only go up, that housing prices never fall, or that some firms are too big to fail. Whether true or false, stories like these - transmitted by word of mouth, by the news media, and increasingly by social media - drive the economy by driving our decisions about how and where to invest, how much to spend and save, and more. But despite the obvious importance of such stories, most economists have paid little attention to them. *Narrative Economics* sets out to change that by laying the foundation for a way of understanding how stories help propel economic events that have had led to war, mass unemployment, and increased inequality. The stories people tell - about economic confidence or panic, housing booms, the American dream, or Bitcoin - affect economic outcomes. *Narrative Economics* explains how we can begin to take these stories seriously. It may be Robert Shiller's most important book to date.

(Belknap Pr.)

2019 : 10 336 p. Hardback 9780674237544 US\$29.95

Why are cell-phone plans so much more expensive in the United States than in Europe? It seems a simple question. But the search for an answer took Thomas Philippon on an unexpected journey through some of the most complex and hotly debated issues in modern economics. Ultimately he reached his surprising conclusion: American markets, once a model for the world, are giving up on healthy competition. Sector after economic sector is more concentrated than it was twenty years ago, dominated by fewer and bigger players who lobby politicians aggressively to protect and expand their profit margins. Across the country, this drives up prices while driving down investment, productivity, growth, and wages, resulting in more inequality. Meanwhile, Europe - long dismissed for competitive sclerosis and weak antitrust - is beating America at its own game.

This edited volume brings together papers that investigate the way Asian migrants experience, think about, perceive and utilize their bodies as part of the journeys they have embarked on. In exploring how bodies are physically and symbolically marked by migration experiences, the volume seeks to move beyond the immediate effects of hard labour and (potentially) exploitative or abusive situations. It shows that migrants are not only on the receiving end where it concerns their bodies, nor are their bodies only utilized for their work as migrants: they also seek control over their bodies and to make them part of strategies to express themselves.

Nussbaum, Martha C.

(Belknap Pr.)

2019 : 08 272 p. Hardback 9780674052499 US\$27.95

The cosmopolitan political tradition in Western thought begins with the Greek Cynic Diogenes, who, when asked where he came from, responded that he was a citizen of the world. Rather than declaring his lineage, city, social class, or gender, he defined himself as a human being, implicitly asserting the equal worth of all human beings. Martha Nussbaum pursues this “noble but flawed” vision of world citizenship as it finds expression in figures of Greco-Roman antiquity, Hugo Grotius in the seventeenth century, Adam Smith during the eighteenth century, and various contemporary thinkers. She confronts its inherent tensions: the ideal suggests that moral personality is complete, and completely beautiful, without any external aids, while reality insists that basic material needs must be met if people are to realize fully their inherent dignity.

Taylor, Charles et al.

Today's democracies suffer from two mutually reinforcing ills: a decline in their problem-solving capacities and a growing disconnect between the people and political elites. In communities harmed by loss of industry, jobs, and population, people often struggle to maintain a basic sense of citizen efficacy. The trouble is that local mechanisms of political action seem incapable of responding to new challenges. State and federal governments possess the means to act, but, disconnected from local concerns, they lack understanding of the community's needs and affinities. Under such conditions citizens come to see themselves as victims of circumstances beyond their control. The resulting frustration has been crucial to the recent political success of destabilizing demagogues.

Following victory in World War II, American leaders devised an extraordinarily bold policy for the occupations of Nazi Germany and imperial Japan: to achieve their permanent demilitarization by compelled democratization. A quintessentially American feature of this policy was the replacement of fascist legal orders with liberal rule-of-law regimes. In his comparative investigation of these epic reform projects, noted legal historian R. W. Kostal shows that Americans found it easier to initiate the reconstruction of foreign legal orders than to complete the process. While American agencies made significant inroads in the elimination of fascist public law in Germany and Japan, they were markedly less successful in generating allegiance to liberal legal ideas and institutions.

The Force of Nonviolence: The Ethical in the Political

Butler, Judith

(Verso)

2020 : 02 224 p. Hardback 9781788732765 £14.99

Judith Butler's new book shows how an ethic of nonviolence must be connected to a broader political struggle for social equality. Further, it argues that nonviolence is often misunderstood as a passive practice that emanates from a calm region of the soul, or as an individualist ethical relation to existing forms of power. But, in fact, nonviolence is an ethical position found in the midst of the political field. An aggressive form of nonviolence accepts that hostility is part of our psychic constitution, but values ambivalence as a way of checking the conversion of aggression into violence. One contemporary challenge to a politics of nonviolence points out that there is a difference of opinion on what counts as violence and nonviolence. The distinction between them can be mobilised in the service of ratifying the state's monopoly on violence.

Hegel, Marx, Nietzsche: or the Realm of the Shadows proposes that the modern world is, at the same time, Hegelian in terms of the state, Marxist in terms of the social and society and Nietzschean in terms of civilisation and its values. As early as 1939, Lefebvre had pioneered a French reading of Nietzsche that rejected the philosopher's appropriation by fascists, bringing out the tragic implications of Nietzsche's proclamation that 'God is dead' long before this approach was followed by such later writers as Foucault, Derrida and Deleuze. Forty years later, in the last of his philosophical writings, Lefebvre juxtaposed the contributions of the three great thinkers, in a text that's themes remain surprisingly relevant today.

The Paradox of Being: Truth, Identity, and Images in Daoism

Harvard-Yenching Institute Monograph, 120 / Harvard University Asia Center (Harvard U.P.)

2019 : 11 400 p. Hardback 9780674241107 US\$75.00

Through research into Daoist ritual in history and as it survives today, Andersen shows that the concept of truth in Chinese Daoist philosophy and ritual posits being as a paradox anchored in the inexistent Way, and consists in seeking to be an exception to ordinary norms and rules of behavior which nonetheless engages what is common to us all.

Critical Categories in the Study of Religion / Acumen (Routledge)

2019 : 10 386 p. Hardback 9781844658374 £175.00 Paperback 9781844658381 £39.99

Shinto is one of the most contested categories in the field of Japanese religious studies. While the term "Shinto" has a long history in the pre-modern period, this volume focuses on how the term has evolved in modern Japan. Divided into five parts, the book covers: Shinto and the modern Japanese nation state / Pre-war Japanese intellectuals on Shinto / Shinto and ultra-nationalism of the 1930s and 1940s / Post-war reforms and reformulations / Contemporary ways of defining Shinto

2019 : 12 244 p. Hardback 9781789206111 US\$150.00 Paperback 9781789206203 US\$24.95

In unforgettable stories of the human journey, a combination of storytelling and dialog underscore an excavation into the deep past of human development and its consequences. Through a first encounter between a Neanderthal woman and the Modern Human she called Traveler, to the emergence and destruction of the world's first cities, *Mixed Harvest* tells the tale of the Sedentary Divide, the most significant event since modern humans emerged. Rob Swigart's latest work humanizes the rapid transition to agriculture and pastoralism with a grounding in the archaeological record.

Living Standards in Southeast Asia: Changes over the Long Twentieth Century, 1900-2015

Booth, Anne

Transforming Asia, 5 (Amsterdam U.P.)

2019 : 11 344 p. Hardback 9789463729819 £94.00

The monograph examines changes in living standards across the ten countries of Southeast Asia (Indonesia, Malaysia, Singapore, Philippines, Thailand, Brunei, Myanmar, Vietnam, Cambodia and Laos) from the early years of the 20th century to the early 21st century. It covers both the last decades of the colonial period, the transition to independence and the decades from 1960 to the 2010s. The study uses a range of monetary and non-monetary indicators to assess how living standards have changed over time.

Michael D. Gordin and G. John Ikenberry bring together leading scholars from disciplines ranging from international relations and political theory to cultural history and science and technology studies, who together provide new perspectives on Hiroshima as both a historical event and a cultural phenomenon. As an event, Hiroshima emerges in the flow of decisions and hard choices surrounding the bombing and its aftermath. As a phenomenon, it marked a revolution in science, politics, and the human imagination - the end of one age and the dawn of another.

Reading Old Books: Writing with Traditions

Mack, Peter

(Princeton U.P.)

2019 : 09 256 p. Hardback 9780691194004 ¥4,660

Reading Old Books argues that the best way to understand tradition is by examining the moments when a writer takes up an old text and writes something new out of a dialogue with that text and the promptings of the present situation. The book examines Petrarch as a user, instigator, and victim of tradition. It shows how Chaucer became the first great English writer by translating and adapting a minor poem by Boccaccio. It investigates how Ariosto, Tasso, and Spenser made new epic meanings by playing with assumptions, episodes, and phrases translated from their predecessors. It analyzes how the Victorian novelist Elizabeth Gaskell drew on tradition to address the new problem of urban deprivation in *Mary Barton*. And, finally, it looks at how the Kenyan writer Ngũgĩ wa Thiong'o, in his 2004 novel *Wizard of the Crow*, reflects on biblical, English literary, and African traditions.

Dark Data: Why What You Don't Know Matters

Hand, David J.

(Princeton U.P.)

2020 : 01 336 p. Hardback 9780691182377 ¥3,980

Dark Data explores the many ways in which we can be blind to missing data and how that can lead us to conclusions and actions that are mistaken, dangerous, or even disastrous. Examining a wealth of real-life examples, from the Challenger shuttle explosion to complex financial frauds, Hand gives us a practical taxonomy of the types of dark data that exist and the situations in which they can arise, so that we can learn to recognize and control for them. In doing so, he teaches us not only to be alert to the problems presented by the things we don't know, but also shows how dark data can be used to our advantage, leading to greater understanding and better decisions.

Tales of Impossibility: The 2000-Year Quest to Solve the Mathematical Problems of Antiquity

Richeson, David S.

(Princeton U.P.)

2019 : 10 456 p. Hardback 9780691192963 ¥3,980

Tales of Impossibility recounts the intriguing story of the renowned problems of antiquity, four of the most famous and studied questions in the history of mathematics. First posed by the ancient Greeks, these compass and straightedge problems - squaring the circle, trisecting an angle, doubling the cube, and inscribing regular polygons in a circle - have served as ever-present muses for mathematicians for more than two millennia. David Richeson follows the trail of these problems to show that ultimately their proofs - demonstrating the impossibility of solving them using only a compass and straightedge - depended on and resulted in the growth of mathematics.

Artificial You: AI and the Future of Your Mind

Schneider, Susan

(Princeton U.P.)

2019 : 10 192 p. Hardback 9780691180144 ¥3,320

In *Artificial You*, Susan Schneider says that it is inevitable that AI will take intelligence in new directions, but urges that it is up to us to carve out a sensible path forward. As AI technology turns inward, reshaping the brain, as well as outward, potentially creating machine minds, it is crucial to beware. Homo sapiens, as mind designers, will be playing with "tools" they do not understand how to use: the self, the mind, and consciousness. Schneider argues that an insufficient grasp of the nature of these entities could undermine the use of AI and brain enhancement technology, bringing about the demise or suffering of conscious beings. To flourish, we must grasp the philosophical issues lying beneath the algorithms.
