Jennifer Egan described her Pulitzer Prize-winning novel *A Visit from the Goon Squad* as a combination of Proust and *The Sopranos*. In rereading the book, Ivan Kreilkamp takes Egan up on her comparison, showing how it blends a concern with the status of the novel in the twenty-first century with an elegiac meditation on how we experience the passage of time.

Vineland is hardly anyone's favorite Thomas Pynchon novel. Marking Pynchon's return after vanishing for nearly two decades following his epic *Gravity's Rainbow*, it was initially regarded as slight, a middling curiosity. However, for Peter Coviello, the oft-overlooked *Vineland* opens up new ways of thinking about Pynchon's writing and about how we read and how we live in the rough currents of history.

California Dreaming: Movement and Place in the Asian American Imaginary

Balance, Christine Bacareza et al. (ed.)

Intersections: Asian and Pacific American Transcultural Studies (Univ. of Hawaii Pr.)

2020 : 08 318 Hardback 9780824872069 US\$68.00

California Dreaming is a multi-genre collection featuring works by Asian American artists based in California. Exploring the places of "Asian America" through the migration and circulation of the arts, this volume highlights creative processes and the flow of objects to understand the rendering of California's imaginary. Here, "California" is interpreted as both a specific locale and an identity marker that moves, linking the state's cultural imaginary, labor, and economy with Asia Pacific, the Americas, and the world. Together, the works in this collection shift previous models and studies of the "Golden State" as the embodiment of "frontier mentality" and the discourse of exceptionality to a translocal, regional, and archipelagic understanding of place and cultural production.

Can Heterodox Economics Make a Difference?: Conversations With Key Thinkers

Armstrong, Phil

(Edward Elgar)

2020 : 11 528 p. Hardback 9781800370883 £125.00

In a series of in-depth interviews with leading economists and policy-makers from different schools including Austrian, Monetarist, New-Keynesian, Post-Keynesian, Modern Monetary Theory, Marxist and Institutionalist, this intriguing book sheds light upon the behaviour of economists and the sociology of the economics profession by enabling economists to express their views on a wide range of issues. Exploring why the aftermath of the 2008 global financial crisis did not pave the way for an uptake in heterodox economic approaches, these key thinkers consider why mainstream economics still reigns supreme and explore whether an alternative approach can be developed to rival it. The most important issues facing the discipline are addressed, and the book offers a particular focus upon the extent to which radical economists can work together to provide a genuine alternative to orthodoxy.

The Japanese Banking Crisis

Himino, Ryozo

(Palgrave Macmillan)

2021 : 01 121 p. Hardback 9789811595974 EUR29.99

This book provides a readable narrative of the bubbles and the banking crisis Japan experienced during the two decades between the late 1980s and the early 2000s. Japan, which was a leading competitor in the world's manufacturing sector, tried to transform itself into an economy with domestic demand-led mature growth, but the ensuing bubbles and crisis instead made the country suffer from chronic deflation and stagnation. The book analyses why the Japanese authorities could not avoid making choices that led to this outcome. The chapters are based on the lectures to regulators from emerging economies delivered at the Global Financial Partnership Center of the Financial Services Agency of Japan.

Rethinking Wealth and Taxes: Inequality, Globalization and Capital Income

Poitras, Geoffrey

Rethinking Economics series (Edward Elgar)

2020 : 08 264 p. Hardback 9781839106149 £90.00

Taxes on the wealthy are a topic sure to incite venomous rants from both right-wing and left-wing ideologues. The topic attracts conflicting interpretations and policy recommendations, and generates proposals for tax reform that consume political debate. All this activity takes place against an opaque backdrop of empirical evidence dealing with the distribution of wealth and income, and tax avoidance and tax evasion by corporations and wealthy individuals. *Rethinking Wealth and Taxes* explores these problems and considers the possibilities for increasing taxes on wealth to address the increasingly unequal distribution of wealth and income.

Issues of religion and race/ethnicity undergird current national debates around immigration, racial profiling, and democratic freedoms, but these issues, as the contributors document, are longstanding ones in the United States.

Buddhism and Business: Merit, Material Wealth, and Morality in the Global Market Economy

Contemporary Buddhism (Univ. of Hawaii Pr.)

Although Buddhism is known for emphasizing the importance of detachment from materiality and money, in the last few decades Buddhists have become increasingly ensconced in the global market economy. The contributors to this volume address how Buddhists have become active participants in market dynamics in a global age, and how Buddhists and non-Buddhists alike engage Buddhism economically. Whether adopting market logics to promote the Buddha's teachings, serving as a source of semantics and technologies to maximize company profits, or reacting against the marketing and branding of the religion, Buddhists in the twenty-first century are marked by a heightened engagement with capitalism.

The Buddhist Self: On Tathāgatagarbha and Atman

Jones, C.V.

(Univ. of Hawaii Pr.)

2020 : 11 320 p. Hardback 9780824883423 US\$68.00

The Buddhist Self is a methodical examination of Indian teaching about the tathāgatagarbha (otherwise the presence of one's "Buddha-nature") and the extent to which different Buddhist texts and authors articulated this in terms of the self. C. V. Jones attends to each of the Indian Buddhist works responsible for explaining what is meant by the expression tathāgatagarbha, and how far this should be understood or promoted using the language of selfhood. With close attention to these sources, Jones argues that the trajectory of Buddha-nature thought in India is also the history and legacy of a Buddhist account of what deserves to be called the self: an innovative attempt to equip Mahāyāna Buddhism with an affirmative response to wider Indian interest in the discovery of something precious or even divine in one's own constitution.

Buddhist Healing in Medieval China and Japan

Salguero, C. Pierce & Macomber, Andrew (ed.)

(Univ. of Hawaii Pr.)

2020 : 08 264 p. Hardback 9780824881214 US\$68.00

From its inception in northeastern India in the first millennium BCE, the Buddhist tradition has advocated a range of ideas and practices that were said to ensure health and well-being. As the religion developed and spread to other parts of Asia, healing deities were added to its pantheon, monastic institutions became centers of medical learning, and healer-monks gained renown for their mastery of ritual and medicinal therapeutics. In China, imported Buddhist knowledge contended with a sophisticated, state-supported system of medicine that was able to retain its influence among the elite. Further afield in Japan, where Chinese Buddhism and Chinese medicine were introduced simultaneously as part of the country's adoption of civilization from the "Middle Kingdom," the two were reconciled by individuals who deemed them compatible. In East Asia, Buddhist healing would remain a site of intercultural tension and negotiation. While participating in transregional networks of circulation and exchange, Buddhist clerics practiced locally specific blends of Indian and indigenous therapies and occupied locally defined social positions as religious and medical specialists.

Remembering Our Grandfathers' Exile is a composite chronicling of the Hawai'i Japanese immigrant experience in mainland exile and internment during World War II, from pre-war climate to arrest to exile to return. Told through the eyes of a granddaughter and researcher born during the war, it is also a research narrative that reveals parallels between pre-WWII conditions and current twenty-first century anti-immigrant attitudes and heightened racism. The book introduces Okawa's grandfather, Reverend Tamasaku Watanabe, a Protestant minister, and other Issei prisoners - all legal immigrants excluded by law from citizenship - in a collective biographical narrative that depicts their suffering, challenges, and survival as highly literate men faced with captivity in the little-known prison camps run by the U.S. Justice and War Departments.

2020 : 08 256 p. 117 b/w & 2 maps. Hardback 9781477321515 US\$50.00

The Dolph Briscoe Center for American History 収蔵のヒロシマ・ナガサキの原爆写真

In August 1945, the United States dropped atomic bombs on Hiroshima and Nagasaki, and the immediate aftermath was documented by Japanese photographers. For the most part the images they produced were censored or confiscated, but many were preserved in secret. Some were published widely in Japan during the 1950s, though not in the United States. Later, prints and negatives were gathered by groups such as the Anti-Nuclear Photographers' Movement of Japan, whose collection is now housed at the Briscoe Center for American History. The center's Hiroshima and Nagasaki Atomic Bomb Photographs Archive consists of more than eight hundred photographs, over one hundred of which are seen here for the first time in an English-language publication. To mark the seventy-fifth anniversary of the bombings, *Flash of Light, Wall of Fire* features the work of twenty-three Japanese photographers who risked their lives to capture the devastation. Together these images serve as a visual record of nuclear destruction, the horrific effects of radiation exposure, and the mass suffering that ensued. A preface by Briscoe Center Executive Director Don Carleton, an essay by Michael B. Stoff, and an afterword by Japanese journalist Michiko Tanaka explore how the images were collected and preserved as well as how they helped provoke calls for peace and the abolishment of nuclear weapons.

Empire in Asia: A New Global History. 2 vols

Farrell, Brian P. (ed.)

(Bloomsbury Academic)

2021 : 02 Paperback 9781350182141 £100.00

Asia was the principle focus of empire-builders from Alexander and Akbar to Chinggis Khan and Qianlong and yet, until now, there has been no attempt to provide a comprehensive history of empire in the region. *Empire in Asia* is the first thorough survey of the topic. Volume I traces the evolution of a constellation of competing empires in Asia from the 13th through to the 18th centuries. It describes the history and characteristic features of imperial regimes in each major sub-region of Asia, from the Ottomans and Safavids in the West, Romanovs in the North, Mughals in the South, the Mongols & their successors in Inner Asia, to the Ming and Qing Dynasties in the East. Volume II covers the long 19th century, commonly seen in terms of 'high imperialism' and the global projection of Western power. It explores the dynamic, volatile and contested processes which caused, by the early years of the 20th century, the integration of Asian states, spaces and peoples into the wider dynamics of global reordering.

What Would Nature Do?: A Guide for Our Uncertain Times

DeFries, Ruth

(Columbia U.P.)

2020 : 12 264 p. Hardback 9780231199421 US\$26.95

Ruth DeFries argues that a surprising set of time-tested strategies from the natural world can help humanity weather these crises. Through trial and error over the eons, life has evolved astonishing and counterintuitive tricks in order to survive. DeFries details how a handful of fundamental strategies - investments in diversity, redundancy over efficiency, self-correcting feedbacks, and decisions based on bottom-up knowledge - enable life to persist through unpredictable, sudden shocks. Lessons for supply chains from a leaf's intricate network of veins and stock market-saving "circuit breakers" patterned on planetary cycles reveal the power of these approaches for modern life. With humility and willingness to apply nature's experience to our human-constructed world, DeFries demonstrates, we can withstand uncertain and perilous times.
