Haruki Murakami, a global literary phenomenon, has said that he started writing fiction as a means of self-therapy. What he has not discussed as much is what he needed self-therapy for. This book argues that by understanding more about why Murakami writes, and by linking this with the question of how he writes, readers can better understand what he writes. Murakami's fiction, in other words, can be read as a search for self-therapy.

2021 : 09 240 p. Hardback 9780472074983 US\$70.00 Paperback 9780472054985 US\$24.95

Fusako Innami offers the first comprehensive study of touch and skinship - relationality with the other through the skin - in modern Japanese writing. The concept of the unreachable - that is, the lack of characters' complete ability to touch what they try to reach for - provides a critical intervention on the issue of intimacy. Touch has been philosophically addressed in France, but literature is an effective - or possibly the most productive - venue for exploring touch in Japan, as literary texts depict what the characters may be concerned with but may not necessarily say out loud. Such a moment of capturing the gap between the felt and the said - the interaction between the body and language - can be effectively analyzed by paying attention to layers of verbalization, or indeed translation, by characters' utterances, authors' depictions, and readers' interpretations. Each of the writers discussed in this book - starting with Nobel prize winner Kawabata Yasunari, Tanizaki Jun'ichirō, Yoshiyuki Junnosuke, and Matsuura Rieko - presents a particular obsession with objects or relationality to the other constructed via the desire for touch.

## Language Standardization and Language Variation in Multilingual Contexts: Asian Perspectives

*Multilingual Matters* (Multilingual Matters)

中国、日本、韓国、タイに言及

This important contribution to the sociolinguistics of Asian languages breaks new ground in the study of language standards and standardization in two key ways: in its focus on Asia, with particular attention paid to China and its neighbours, and in the attention paid to multilingual contexts. The chapters address various kinds of (sometimes hidden) multilingualism and examine the interactions between multilingualism and language standardization, offering a corrective to earlier work on standardization, which has tended to assume a monolingual nation state and monolingual individuals. Taken together, the chapters in this book thus add to our understanding of the ways in which multilingualism is implicated in language standardization, as well as the impact of language standards on multilingualism.

## Mysteries of English Grammar: A Guide to Complexities of the English Language

(Routledge)

2021 : 09 176 p. Hardback 9780367710248 £84.99 Paperback 9780367710279 £19.99

Despite a history of hundreds of years of research analysing aspects of English grammar, there are still open problems which continue to baffle language researchers today. Such 'grammar mysteries' arise for a number of reasons: because the language is changing; because different speakers of the language adhere to distinct norms and thus introduce and maintain variation in the system; because there are differences between the grammar of spoken and written English. This book illuminates some of the complexities of the subject, the areas where new discoveries await and why it matters.

Using theories of national, transnational and world cinema, and genre theories and psychoanalysis as the basis of its argument, *Japanese Horror Cinema and Deleuze* argues that these understandings of Japanese horror films can be extended in new ways through the philosophy of Deleuze. In particular, the complexities and nuances of how films like *Ju-On: The Grudge* (2002), *Audition* (1999) and *Kairo* (2001) (and beyond) form dynamic, transformative global networks between industries, directors and audiences can be considered. Furthermore, understandings of how key horror tropes and motifs apply to these films (and others more broadly), such as the idea of the “monstrous-feminine”, can be transformed, allowing these models to become more flexible.

Through positioning tartan within broader philosophical, political and cultural contexts, from the tartan-clad Highland regiments and Queen Victoria's royal endorsement, to the fabric's influence on Westwood and McQueen and a generation of Japanese designers such as Watanabe and Takahashi, Jonathan Faiers traces tartan's development from clanship to contemporary fashion and its enormous domestic and global impact.

In 1966 two columnists joined Newsweek magazine. Their assignment: debate the world of business and economics. Paul Samuelson was a towering figure in Keynesian economics, which supported the management of the economy along lines prescribed by John Maynard Keynes's *General Theory*. Milton Friedman, little known at that time outside of conservative academic circles, championed “monetarism” and insisted the Federal Reserve maintain tight control over the amount of money circulating in the economy. In *Samuelson Friedman*, author and journalist Nicholas Wapshott brings narrative verve and puckish charm to the story of these two giants of modern economics, their braided lives and colossal intellectual battles.

## Japan, the Sustainable Society: The Artisanal Ethos, Ordinary Virtues, and Everyday Life in the Age of Limits

2021 : 12 290 p. Hardback 9780520383517 US\$70.00 Paperback 9780520383524 US\$34.95

By the late twentieth century, Japan had gained worldwide attention as an economic powerhouse. Having miraculously risen from the ashes of World War II, it was seen by many as a country to be admired if not emulated. But by the early 1990s, that bubble burst in spectacular fashion. The Japanese economic miracle was over. In this book, John Lie argues that in many ways the Japan of today has the potential to be even more significant than it was four decades ago. As countries face the prospect of a world with decreasing economic growth and increasing environmental dangers, Japan offers a unique glimpse into what a viable future might look like - one in which people acknowledge the limits of the economy and environment while championing meaningful and sustainable ways of working and living. Beneath and beyond the rhetoric of growth, some Japanese are leading sustainable lives and creating a sustainable society. Though he does not prescribe a one-size-fits-all cure for the world, Lie makes the compelling case that contemporary Japanese society offers a possibility for how other nations might begin to valorize everyday life and cultivate ordinary virtues.

Rapid social economic changes, the transition from a planned economy to a market economy, or even economic liberalization can lead to political instability and the collapse of authoritarian regimes. Despite experiencing all of these unprecedented changes in the past forty years, China under the Chinese Communist Party's leadership has so far successfully transformed and improved both its governance capacity and its ruling capacity. *Governing and Ruling* addresses this regime resilience puzzle by examining the political logic of its taxation system, especially the ways in which taxation helps China handle three governance problems: maneuvering social control, improving agent discipline, and eliciting cooperation.

Climate change is a slowly advancing crisis sweeping over the planet and affecting different habitats in strikingly diverse ways. While nations have signed treaties and implemented policies, most actual climate change assessments, adaptations, and countermeasures take place at the local level. People are responding by adjusting their practices, livelihoods, and cultures, protesting and migrating. This book portrays the diversity of explanations and remedies as expressed at the community level and its emphasis on the crucial importance of ethnographic detail in demonstrating how people in different parts of the world are scaling down the phenomenon of global warming.

### Consumer Culture Theory in Asia: History and Contemporary Issues

Minowa, Yuko & Belk, Russell (ed.)

*Routledge Frontiers in the Development of International Business, Management and Marketing* (Routledge)

2021 : 12 274 p. Hardback 9780367629496 £120.00

Works in this volume examine the consumer cultures that exist in today's precarious Asia. They do this through culturally oriented, critical consumer research. How deeply has the consumer precariousness in Asia been intertwined with the sociohistorical patterning of consumption including class, gender, and other social categories? How do these problematics affect consumers' identity projects, consumer rituals, and marketplace cultures? How is consumer precariousness aggravated by the governmentality of the superpower? How does the changing landscape of inter-Asian and global popular culture impact consumer culture in these nations? Together, the authors in this volume attempt to answer these questions through consumer research within the paradigm known as consumer culture theory (CCT). Since most CCT inquiry has been in Western contexts, this volume augments the existing knowledge. It presents the most current, critical, historical, and material consumer studies focused on Asia.

2021 : 12 246 p. Hardback 9781978809024 US\$120.00 Paperback 9781978809017 US\$34.95

This book provides an in-depth exploration and analysis of marriages between Japanese nationals and migrants from three broad ethnic/cultural groups - spouses from the former Soviet Union countries, the Philippines, and Western countries. It reveals how the marriage migrants navigate the intricacies and trajectories of their marriages with Japanese people while living in Japan. Seen from the lens of 'gendered geographies of power', the book explores how state-level politics and policies towards marriage, migration, and gender affect the personal power politics in operation within the relationships of these international couples. Overall, the book discusses how ethnic identity intersects with gender in the negotiation of spaces and power relations between and amongst couples; and the role states and structural inequalities play in these processes, resulting in a reconfiguration of our notions of what international marriages are and how powerful gender and the state are in understanding the power relations in these unions.

Corburn, Jason

(Island Pr.)

2022 : 01 280 p. Paperback 9781642831726 US\$30.00

In *Cities for Life*, public health expert Jason Corburn shares lessons from three of these cities: Richmond, California; Medellín, Colombia; and Nairobi, Kenya. Corburn draws from his work with citizens, activists, and decision-makers in these cities over a ten-year period, as individuals and communities worked to heal from trauma - from gun violence, housing and food insecurity, and poverty. Corburn shows how any community can rebuild their social institutions, practices, and policies to be more focused on healing and health. This means not only centering those most traumatized in decision-making, Corburn explains, but confronting historically discriminatory, exclusionary, and racist urban institutions, and promoting healing-focused practices, place-making, and public policies.

*Rethinking Authority in China's Border Regime: Regulating the Irregular* investigates the Chinese government's response to this phenomenon. Hence, this book presents a comprehensive analysis of the Chinese border regime. It explores the regulatory framework of border mobility in China by analysing laws, institutions, and discourses as part of an ethnographic border regime analysis. It argues that the Chinese state deliberately creates 'zones of exception' along its border. In these zones, local governments function as 'scalar managers' that establish cross-border relations to facilitate cross-border mobility and create local migration systems that build on their own notion of legality by issuing locally valid border documents.

Rossi, Christopher R.

(U. of Michigan Pr.)

*Remoteness Reconsidered* employs the idea of remoteness as an analytical tool for viewing international law's encounter with the Americas from the unusual, peripheral perspective of the Atacama Desert. The Atacama is regarded as one of the most remote places on Earth, although that less-than-accurate perspective comes from standard historical accounts of the region, accounts that originate from the "center." Changing the usual frame of reference leads to a reconsideration of the idea of remoteness and of the subsequent marginalization of historical narratives that influence hemispheric international relations in important ways today. Lessons about international law's encounters with neoliberalism, indigenous and human rights, and the management and extraction of mineral resources take on new significance by following a spatial turn toward the idea of remoteness as applied to the Atacama Desert.

In the early twenty-first century, trauma is seemingly everywhere, whether as experience, diagnosis, concept, or buzzword. Yet even as many scholars consider trauma to be constitutive of psychological modernity or the post-Enlightenment human condition, historical research on the topic has overwhelmingly focused on cases, such as World War I or the Holocaust, in which Western experiences and actors are foregrounded. There remains an urgent need to incorporate the methods and insights of recent historical trauma research into a truly global perspective. The chapters in *Traumatic Pasts in Asia* make just such an intervention, extending Euro-American paradigms of traumatic experience to new sites of world-historical suffering and, in the process, exploring how these new domains of research inform and enrich earlier scholarship.

This introduction to Tanabe Hajime (1885-1962), the critical successor of the “father of contemporary Japanese philosophy” Nishida Kitaro (1870-1945), focuses on Tanabe's central philosophical ideas and perspective on self, world, knowledge, and the purpose of philosophizing. Addressing Tanabe's life-long study of the history of Anglo-European philosophy, Takeshi Morisato explores his notable philosophical ideas including the logic of species, metanoetics, and philosophy of death. He sets out Tanabe's belief that the Anglo-European framework of thinking is incapable of giving sufficient answers to the philosophical questions concerning the self and the world together and discusses the central ideas he developed while working in both Judeo-Christian and Mahayana Buddhist traditions.

*The Early 20th Century Resurgence of the Tibetan Buddhist World* is a cohesive collection of studies by Japanese, Russian and Central Asian scholars deploying previously unexplored Russian, Mongolian, and Tibetan sources concerning events and processes in the Central Asian Buddhist world in the late 19th and early 20th centuries. Set in the final days of the Qing empire when Russian and British empires were expanding into Central Asia, this work examines the interplay of religious, economic and political power among peoples who acknowledged the religious authority of Tibet's Dalai Lama.

*The Pocket Guide to the Insects of Costa Rica* reveals the sheer number and diversity of insects and arthropods of the tropics. Every square meter of rainforest and cloud forest in Costa Rica offers up multitudes of gemlike tiny creatures with enough wonders to keep an entomologist busy for a lifetime. But given that Costa Rica is home to potentially more than 250,000 species - the majority of which have yet to be named - where to begin? This *Pocket Guide* helps orient those new to the insect world, featuring the species that one would most likely encounter on a walk through the forests of Costa Rica.
