Shakespeare's House: A Window onto his Life and Legacy

Schoch, Richard

(Arden Shakespeare)

2023 : 11 200 p. Hardback 9781350409354 £25.00

Based on original research in the archives of the Shakespeare Birthplace Trust in Stratford-upon-Avon and the Folger Shakespeare Library in Washington, DC, and featuring two black and white illustrated plate sections which draw on the wide array of material available at the Folger Shakespeare Library and the Victoria and Albert Museum, this book traces the history of Shakespeare's birthplace over four centuries. Beginning in the 1560s, when Shakespeare was born there, it ends in the 1890s, when the house was rescued from private purchase and turned into the Shakespeare monument that it remains today.

Seargeant, Philip

(Bloomsbury Academic)

2023 : 11 256 p. Hardback 9781350278851 £20.00

From George Orwell's fictional predictions in *Nineteen Eighty-Four* to the very real warnings of climate activist Greta Thunberg, Seargeant explores language through time, traversing politics, religion, philosophy, literature, and of course technology, in the process. Tracing how previous eras have imagined the future of language, from the Bible to the works H. G. Wells, and from *Star Wars* to *Star Trek*, the book reveals how perfecting language and communication has always been a vital component of utopian dreams of the future.

(Edinburgh U.P.)

2024 : 01 208 p. Hardback 9781474470018 £90.00 Paperback 9781474470025 £24.99

In this book, McElvenny offers a concise history of modern linguistics from its emergence in the early nineteenth century up to the end of World War II. Written as a collective biography of the field, it concentrates on the interaction between the leading figures of linguistics, their controversies, and the role of the social and political context in shaping their ideas and methods. While *A History of Modern Linguistics* focuses on disciplinary linguistics, the boundaries of the account are porous: developments in neighbouring fields - in particular, philosophy, psychology and anthropology - are brought into the discussion where they have contributed to linguistic research.

Cross-Cultural Pragmatics and Foreign Language Learning

House, Juliane & Kadar, Daniel Z.

Edinburgh Studies in Pragmatics (Edinburgh U.P.)

2024 : 01 240 p. Hardback 9781399523226 £90.00

Cross-Cultural Pragmatics and Foreign Language Learning provides a new ground-breaking approach to the study of second language learning through the lens of cross-cultural pragmatics. Cross-cultural pragmatics involves the use of contrastive linguistic research, supported by a variety of methodologies such as surveys, interviews and discourse completion tests. A key strength of the speech act-centred interactional framework proposed is that it allows the reader to understand difficulties faced by foreign language learners through pragmatic evidence. An important advantage of this approach is that it consistently avoids ideological pre-assumptions and related overgeneralisations.

Beethoven's Ninth Symphony: Rehearsing and Performing its 1824 Premiere

Albrecht, Theodore

(Boydell & Brewer)

2024 : 02 322 p. Hardback 9781837651054 £70.00

In his new book, Theodore Albrecht brings to life the day-to-day details that it took to stage that premiere. It's a story of negotiating for performance halls and performers' payments, of hand-copying legible scores and individual parts for over 120 performers, of finding financiers, as well as space and time for rehearsals. Importantly, it is also a story of the relationship between Beethoven and the musicians who performed this symphonic masterpiece. In fact, as the maddening rehearsal schedule towards the symphony's premiere shows, it transpires that many passages of the Ninth have been tailored to specific orchestral players.

Cooper, Barry A.R.

(Boydell & Brewer)

2024 : 02 320 p. 102 music exx. Hardback 9781783277919 £85.00

For most of the symphonies the sketches have not previously been fully examined. In contrast, Cooper's book provides a much deeper exploration of these sketches, along with autograph scores, corrected copies and first editions, while the Beethoven correspondence offers additional information on the first publication and performances of the symphonies. The result is a clear overview of the creation of each symphony in turn, placed within the context of musical life in Beethoven's Vienna. Another strand of the investigation covers Beethoven's unfinished symphonies and how they helped to provide the fertile soil from which the finished ones grew. Most of those did not progress beyond a few bars, but two, known as No. 0 and No. 10, were sketched extensively.

(Univ. of Chicago Pr.)

2023 : 12 288 p. 2 halftones, 49 line drawings. Hardback 9780226828558 ¥7,240

We know Mozart as one of history's greatest composers. But his contemporaries revered him as a multi-instrumentalist, a dazzling improviser, and the foremost keyboard virtuoso of his time. When he composed, it was often with a single aim in mind: to set the stage, quite literally, for compelling and captivating performances. *Mozart the Performer* brings to life this elusive side of Mozart's musicianship. Dorian Bandy traces the influence of showmanship on Mozart's style, showing through detailed analysis and imaginative historical investigation how he conceived his works as a series of dramatic scripts.

The book envisions a burgeoning urban culture through a series of snapshots - daily musical life in all its messy diversity. While tackling themes of cosmopolitanism and nationalism, high and low brows, centres and peripheries, it evokes contemporary voices and characterful individuals to illuminate the period. Challenging issues include the barriers faced by women and people of colour, and attitudes inhibiting the new generation of British composers - not to mention embedded imperialist ideologies reflecting London's precarious position at the centre of Empire.

Pierre Boulez's (1925-2016) creative output has mostly been studied from an analytical perspective in the context of serialism. While Boulez tends to be pigeonholed as a cerebral composer, his interest in structure coexisted with extreme visceral energy. This book redresses the balance and stresses the febrile cultural environment of Paris in the 1940s and the emotional side of his early works.

In *Balance of Power*, economist and historian Éric Monnet charts the rise of central banks as the nominally independent-but unavoidably political-superpowers of modern societies. This trajectory, Monnet argues, is neither inevitable nor unstoppable. By embracing the political natures of today's central banks, we can construct systems of accountability for how they interact with states and societies. Monnet shows that this effort will do more than guard against unjust power; it will put the banks to work for greater, more democratic ends.

Few scholars advanced the frontier of economic modeling more than French economist Maurice Allais. Allais's contributions - beyond his famous *Allais's Paradox* - earned him the Nobel Prize and drew comparisons to the works of Paul Samuelson and even some modern mathematical behavioral economists. Allais's accomplishments, however, went largely unread by non-Francophone readers due to the challenge of their translation for publishers. The effects of this gap are immeasurable. As Paul Samuelson wrote, "Had Allais's earliest writings been in English, a whole generation of economic theory would have taken a different course."

Across original papers and in wide-ranging responses, the contributors analyze barriers of four types: incentives, management, data availability, and regulation. They also suggest that AI has the potential to improve outcomes and lower costs. Understanding both the benefits of and barriers to AI adoption is essential for designing policies that will affect the evolution of the healthcare system.

Many argue that the solution to the financial straits of American retirement is simple: people need to just work longer. Yet this call to work longer is misleading in a multitude of ways, including its endangering of the health of workers and its discrimination against people who work in lower-wage occupations. In *Work, Retire, Repeat*, Teresa Ghilarducci tells the stories of elders locked into jobs-not because they love to work but because they must. But this doesn't need to be the reality. *Work, Retire, Repeat* shows how relatively low-cost changes to how we finance and manage retirement will allow people to truly choose how they spend their golden years.

What is the psychological impact of being barraged by literally thousands of advertisements a day? How does the commercialisation of our public spaces weaken our sense of belonging? How are car manufacturers, airlines and oil companies lobbying to weaken climate action? Examining the devastating impact of advertising on our minds and the planet, *Badvertising* also crucially explores what we can do to change things for the better.

The Japanese have always made strikingly original contributions, even improvements, to whatever they imported. Even more significantly, the "hybridity" of their culture produced ongoing tensions that served as a kind of creative dynamo for Japanese writers, artists, and intellectuals. This book explores the fundamental creative tension between the native and the foreign in many areas of Japanese culture, from politics and religion to art and literature - a tension also often interpreted as between tradition and modernity.

What do we do when we listen? The act of engagement with music in everyday life may seem simple on the surface but participation, interpretation, circulation and cultural production in the digital age are more complex and entangled than ever before. The varied case studies, including teen idol groups and virtual idols, aid the detailed examination of the relation between music, generation, and society.

In *America's New Racial Battle Lines*, they show that US racial policy debates are undergoing fundamental change. Disputes over colorblind versus race-conscious policies have given way to new lines of conflict. Today's conservatives promise to protect traditionalist, predominantly white, Christian Americans against what they call the "radical" Left. Meanwhile, today's progressives seek not just to integrate American institutions but to more fully transform and "repair" pervasive systemic racism.

For generations, experts argued that American politics needed cohesive parties to function effectively. Now many fear that strong partisan views, particularly hostility to the opposing party, are damaging democracy. Is partisanship as dangerous as we fear it is? To provide an answer, this book offers a nuanced evaluation of when and how partisan animosity matters in today's highly charged, dynamic political environment, drawing on panel data from some of the most tumultuous years in recent American history, 2019 through 2021. The authors show that partisanship powerfully shapes political behaviors, but its effects are conditional, not constant. Instead, it is most powerful when politicians send clear signals and when an issue is unlikely to bring direct personal consequences.

He traces these holistic desires through a series of unique practices: institutional Tantra centered on gurus and esoteric rituals; public Tantra marked by performance and festival; folk Tantra focused on magic and personal well-being; and popular Tantra imagined in fiction, film, and digital media.

Since before the American Civil War, African American and Japanese encounters produced relationships and discourses of knowledge that transcended Eurocentric conceptions of civilization and hierarchies of personhood. *Black Transnationalism and Japan* introduces the diverse activity and intellectual movements created, shaped, and led by Japanese and African American people. While some Pan-Asianisms and Pan-Africanisms urged a uniting of colonized spaces against the colonizer, and were often expressed in the form of decolonization movements, this volume introduces various transnational phenomena that transcended such dichotomies. Black American-Japanese transnational encounters often occurred on the non-state level from within the two new competing empires of America and Japan.

Robots Won't Save Japan addresses the Japanese government's efforts to develop care robots in response to the challenges of an aging population, rising demand for eldercare, and a critical shortage of care workers. Drawing on ethnographic research at key sites of Japanese robot development and implementation, James Wright reveals how such devices are likely to transform the practices, organization, meanings, and ethics of caregiving if implemented at scale.

With more than a million copies sold since its first publication, *The Craft of Research* has helped generations of researchers at every level - from high-school students and first-year undergraduates to advanced graduate students to researchers in business and government. Conceived by seasoned researchers and educators Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams, this fundamental work explains how to choose significant topics, pose genuine and productive questions, find and evaluate sources, build sound and compelling arguments, and convey those arguments effectively to others.

While preserving the book's proven approach to the research process, as well as its accessible voice and general structure, this new edition acknowledges the many ways research is conducted and communicated today. Thoroughly revised by Joseph Bizup and William T. FitzGerald, it recognizes that research may end in a product other than a paper - or no product at all - and includes a new chapter about effective presentations. It features fresh examples from a variety of fields that will appeal to today's students and other readers. It also accounts for new technologies used in research and offers basic guidelines for the appropriate use of generative AI. And it ends with an expanded chapter on ethics that addresses researchers' broader obligations to their research communities and audiences as well as systemic questions about ethical research practices.
