## States of Plague: Reading Albert Camus in a Pandemic

Kaplan, Alice & Marris, Laura

(Univ. of Chicago Pr.)

2022 : 10 152 p. Hardback 9780226815534 ¥3,340

In thirteen linked chapters told in alternating voices, Alice Kaplan and Laura Marris hold the past and present of *The Plague* in conversation, discovering how the novel has reached people in their current moment. Kaplan's chapters explore the book's tangled and vivid history, while Marris's are drawn to the ecology of landscape and language. Through these pages, they find that their sense of Camus evolves under the force of a new reality, alongside the pressures of illness, recovery, concern, and care in their own lives. Along the way, Kaplan and Marris examine how the novel's original allegory might resonate for a new generation of readers who have experienced a global pandemic. They describe how they learned to contemplate the skies of a plague spring, to examine the body politic and the politics of immunity.

2022 : 10 208 p. Hardback 9781800412453 £89.95 Paperback 9781800412446 £24.95

How do some language learners triumph against all odds, despite not having obvious heritage links or spending extended periods of time in the L2 environment pre-adulthood? This book delves into the autobiographical stories of learners who achieve nativelike proficiency, opening a narrative window into their experiences and offering insights into their pathways to success. The in-depth analysis ties together a wide range of potentially relevant topics, from motivational vision and international posture to issues of identity, endurance and even musical ability, among other themes.

**Transnational Kaiju: Exploitation, Globalisation and Cult Monster Movies**

Rawle, Steven

(Edinburgh U.P.)

2022 : 08 288 p. Hardback 9781474475808 £85.00

From relatively humble beginnings in a *King Kong*-inspired Japanese studio picture, the *kaijū eiga* has developed into a global genre. While the origins of giant kaijū - the term often preferred to 'monster' - remain firmly rooted in Japan, the figure has become a transnational spectacle. This book explores how *kaijū* went global, from the adoption of Godzilla movies in translation to the appropriation of cultural material across borders. With reference to the genre's global development, its exploitative Western circulation and the labour of fans, the book examines how genres with deep national roots can become transnational phenomena.

Hirst, Damien / Warsh, Larry (ed.)

*ISMs* (Princeton U.P.)

2022 : 10 144 p. Hardback 9780691239859 ¥2,830

*Hirst-isms* is a collection of quotations - bold, surprising, often humorous, and always insightful - from celebrated artist Damien Hirst, whose controversial work explores the connections between art, religion, science, life, and death. Emerging in the 1990s as a leading member of the Young British Artists (YBAs), Hirst first became famous and gained a reputation as a provocateur with a series of artworks featuring dead and sometimes dissected animals (including a shark, sheep, and cow) preserved in glass tanks filled with formaldehyde.

**White: The History of a Color**

Pastoreau, Michel

(Princeton U.P.)

2023 : 01 240 p. Hardback 9780691243498 ¥6,670

As a pigment, white is often thought to represent an absence of color, but it is without doubt an important color in its own right, just like red, blue, green, or yellow - and, like them, white has its own intriguing history. In this richly illustrated book, Michel Pastoreau, a celebrated authority on the history of colors, presents a fascinating visual, social, and cultural history of the color white in European societies, from antiquity to today.

**The Capital Order: How Economists Invented Austerity and Paved the Way to Fascism**

Mattei, Clara E.

(Univ. of Chicago Pr.)

2022 : 11 480 p. Hardback 9780226818399 ¥5,010

In *The Capital Order*, political economist Clara E. Mattei explores the intellectual origins of austerity to uncover its originating motives: the protection of capital - and indeed capitalism - in times of social upheaval from below. Mattei traces modern austerity to its origins in interwar Britain and Italy, revealing how the threat of working-class power in the years after World War I animated a set of top-down economic policies that elevated owners, smothered workers, and imposed a rigid economic hierarchy across their societies. Where these policies “succeeded,” relatively speaking, was in their enrichment of certain parties, including employers and foreign-trade interests, who accumulated power and capital at the expense of labor. Here, Mattei argues, is where the true value of austerity can be observed: its insulation of entrenched privilege and its elimination of all alternatives to capitalism.

**Measuring Distribution and Mobility of Income and Wealth**

Chetty, Raj et al.

*NBER Studies in Income and Wealth, 80* (Univ. of Chicago Pr.)

2022 : 10 792 p. Hardback 9780226816036 ¥27,560

Economic research is increasingly focused on inequality in the distribution of personal resources and outcomes. One aspect of inequality is mobility: are individuals locked into their respective places in this distribution? To what extent do circumstances change, either over the lifecycle or across generations? Research not only measures inequality and mobility, but also analyzes the historical, economic, and social determinants of these outcomes and the effect of public policies. This volume explores the latest developments in the analysis of income and wealth distribution and mobility.

**The Tragic Science: How Economists Cause Harm (Even as They Aspire to Do Good)**

DeMartino, George F.

(Univ. of Chicago Pr.)

2022 : 08 272 p. Hardback 9780226821238 ¥5,850

In *The Tragic Science*, George F. DeMartino says what economists have too long repressed: that economists do great harm even as they aspire to do good. Economist-induced harm, DeMartino shows, results in part from economists' “irreparable ignorance” - from the fact that they know far less than they tend to believe they know - and from disciplinary training that treats the human tolls of economic policies and interventions as simply the costs of promoting social betterment. DeMartino details the complicated nature of economic harm, explores economists' frequent failure to recognize it, and makes a sobering case for professional humility and for genuine respect for those who stand to be harmed by economists' practice.

*Invested* tells the story of how the genre of investment advice developed and grew in the United Kingdom and the United States, from its origins in the eighteenth century through today, as it saturates our world. The authors analyze centuries of books, TV shows, blogs, and more, all promising techniques for amateur investors to master the ways of the market: from Thomas Mortimer's pathbreaking 1761 work, *Every Man His Own Broker*, through the Gilded Age explosion of sensationalist investment manuals, the early twentieth-century emergence of a vernacular financial science, and the more recent convergence of self-help and personal finance.

**Deep South: A Social Anthropological Study of Caste and Class. 2nd ed**

Davis, Allison et al.

(Univ. of Chicago Pr.)

2022 : 08 328 p. Paperback 9780226817989 ¥3,340

First published in 1941, *Deep South* is a landmark work of anthropology, documenting in startling and nuanced detail the everyday realities of American racism. Living undercover in Depression-era Mississippi - not revealing their scholarly project or even their association with one another - groundbreaking Black scholar Allison Davis and his White co-authors, Burleigh and Mary Gardner, delivered an unprecedented examination of how race shaped nearly every aspect of twentieth-century life in the United States. Their analysis notably revealed the importance of caste and class to Black and White worldviews, and they anatomized the many ways those views are constructed, solidified, and reinforced. This reissue of the 1965 abridged edition, with a new foreword from Pulitzer Prize winner Isabel Wilkerson - who acknowledges the book's profound importance to her own work - proves that *Deep South* remains as relevant as ever, a crucial work on the concept of caste and how it continues to inform the myriad varieties of American inequality.

2022 : 04 188 p. Hardback 9780252044403 US\$110.00 Paperback 9780252086472 US\$26.00

Images of Japanese and Japanese American women can teach us what it meant to be visible at specific moments in history. Elena Tajima Creef employs an Asian American feminist vantage point to examine ways of looking at indigenous Japanese Ainu women taking part in the 1904 Louisiana Purchase Exposition; Japanese immigrant picture brides of the early twentieth century; interned Nisei women in World War II camps; and Japanese war brides who immigrated to the United States in the 1950s. Creef illustrates how an against-the-grain viewing of these images and other archival materials offers textual traces that invite us to reconsider the visual history of these women and other distinct historical groups. As she shows, using an archival collection's range as a lens and frame helps us discover new intersections between race, class, gender, history, and photography.

### **Aporophobia: Why We Reject the Poor Instead of Helping Them**

Cortina, Adela

(Princeton U.P.)

2022 : 11 216 p. Hardback 9780691205526 ¥4,670

In this revelatory book, acclaimed political philosopher Adela Cortina makes an unprecedented assertion: the biggest problem facing the world today is the rejection of poor people. Because we can't recognize something we can't name, she proposes the term "aporophobia" for the pervasive exclusion, stigmatization, and humiliation of the poor, which cuts across xenophobia, racism, antisemitism, and other prejudices. Passionate and powerful, *Aporophobia* examines where this nearly invisible daily attack on poor people comes from, why it is so harmful, and how we can fight it.

### **Pandemic Politics: The Deadly Toll of Partisanship in the Age of COVID**

Gadarian, Shana Kushner et al.

(Princeton U.P.)

2022 : 10 400 p. Hardback 9780691218991 ¥5,850

Health is not an inherently polarizing issue, but the Trump administration's partisan response to COVID-19 led ordinary citizens to prioritize what was good for their "team" rather than what was good for their country. Democrats, in turn, viewed the crisis as evidence of Trump's indifference to public well-being. At a time when solidarity and bipartisan unity were sorely needed, Americans came to see the pandemic in partisan terms, adopting behaviors and attitudes that continue to divide us today. This book draws on a wealth of new data on public opinion to show how pandemic politics has touched all aspects of our lives - from the economy to race and immigration - and puts America's COVID-19 response in global perspective.

### **The Dictator's Dilemma at the Ballot Box: Electoral Manipulation, Economic Maneuvering, and Political Order in Autocracy**

*Weiser Center for Emerging Democracies* (U. of Michigan Pr.)

2022 : 06 368 p. Hardback 9780472075317 US\$85.00 Paperback 9780472055319 US\$42.95

Contrary to our stereotypical views, dictators often introduce elections in which they refrain from employing blatant electoral fraud. Why do electoral reforms happen in autocracies? Do these elections destabilize autocratic rule? *The Dictator's Dilemma at the Ballot Box* argues that strong autocrats who can garner popular support become less dependent on coercive electioneering strategies. When autocrats fail to design elections properly, elections backfire in the form of coups, protests, and the opposition's stunning election victories. The book's theoretical implications are tested on a battery of cross-national analyses with newly collected data on autocratic elections and in-depth comparative case studies of the two Central Asian republics of Kazakhstan and Kyrgyzstan.

From the time Mussolini took power in Italy in 1922, Americans have been obsessed with and brooded over the meaning of fascism and how it might migrate to the United States. *Fascism Comes to America* examines how we have viewed fascism overseas and its implications for our own country. Bruce Kuklick explores the rhetoric of politicians, who have used the language of fascism to smear opponents, and he looks at the discussions of pundits, the analyses of academics, and the displays of fascism in popular culture, including fiction, radio, TV, theater, and film.

Many mistakenly believe that it is fruitless to try to persuade those who disagree with them about politics. However, *Persuasion in Parallel* shows that individuals do, in fact, change their minds in response to information, with partisans on either side of the political aisle updating their views roughly in parallel. This book challenges the dominant view that persuasive information can often backfire because people are supposedly motivated to reason against information they dislike.

Schneider, Robert A.

*The Life of Ideas* (Univ. of Chicago Pr.)

2023 : 02 288 p. Hardback 9780226586434 ¥4,840

The term "resentment," often casually paired with words like "hatred," "rage," or "fear," has dominated US news headlines since November 2016. Despite its increased use, this word seems to defy easy categorization. Does "resentment" describe many interlocking sentiments, or is it just another way of saying "anger"? Does it suggest an irrational grievance, as opposed to a legitimate callout of injustice? Does it imply political leanings, or is it nonpartisan by nature? In *The Return of Resentment*, Robert A. Schneider explores these questions and more, moving from eighteenth-century Britain to the aftermath of the French Revolution to social movements throughout the twentieth century. Drawing on a wide range of writers, thinkers, and historical experiences, Schneider illustrates how resentment has morphed across time, coming to express a collective sentiment by movements across the political spectrum.

Drawing on over eight decades of state-level evidence on public opinion, elections, and policymaking, Devin Caughey and Christopher Warshaw pose a powerful challenge to this pessimistic view. Their research reveals that although American democracy cannot be taken for granted, state policymaking is far more responsive to citizens' demands than skeptics claim.

In *Plowshares into Swords*, David Ekbladh recaptures the power of knowledge and information developed between World War I and World War II by an international society of institutions and individuals committed to liberal international order and given focus by the League of Nations in Geneva. That information and analysis revolutionized critical debates in a world in crisis. In doing so, Ekbladh transforms conventional understandings of the United States' postwar hegemony, showing that important elements of it were profoundly influenced by ideas that emerged from international exchanges.

Why do accomplished and stable leaders frequently make calamitous decisions with devastating consequences for their countries - and other nations? We debate debacles such as the American involvement in Vietnam, seeking to understand why leaders pursued disastrous policies. In *Prisoners of Their Premises*, George C. Edwards III argues that the failure of leaders to examine their premises - the assumptions they make about the world and situation they are dealing with - cause them to ignore real problems or pursue policies that, in costly ways, deal with problems that are different than they think or simply don't exist.

How did environmental law first emerge in the United States? Why has it evolved in the ways that it has? And what are the unique challenges inherent to environmental lawmaking in general and in the United States in particular? Since its first edition, *The Making of Environmental Law* has been foundational to our understanding of these questions. For the second edition, Richard J. Lazarus returns to his landmark book and takes stock of developments over the last two decades. Drawing on many years of experience on the frontlines of legal and policy battles, Lazarus provides a theoretical overview of the challenges that environmental protection poses for lawmaking, related to both the distinctive features of US lawmaking institutions and the spatial and temporal dimensions of ecological change.

Drawing on early state constitutions, declarations of religious freedom, Founding-era debates, and the First Amendment's drafting record, Muñoz demonstrates that adherence to the Founders' political philosophy would lead neither to consistently conservative nor consistently liberal results. Rather, adopting the Founders' understanding would lead to a minimalist church-state jurisprudence that, in most cases, would return authority from the judiciary to the American people. Thorough and convincing, *Religious Liberty and the American Founding* is key reading for those seeking to understand the Founders' political philosophy of religious freedom and the First Amendment Religion Clauses.

Reviewing the development of the doctrine over the last half-century, James E. Fleming rebuts popular arguments against substantive due process and shows that the Supreme Court has constructed basic liberties through common law constitutional interpretation: reasoning by analogy from one case to the next and making complex normative judgments about what basic liberties are significant for personal self-government.

As Peritz shows, states are less likely to comply with international rules and international court decisions when domestic industries have the political ability to obstruct compliance in particular cases. The author evaluates the argument with an extensive empirical analysis that traces the domestic politics of compliance with the decisions of two international economic courts: the World Trade Organization's dispute settlement mechanism and the Court of Justice of the European Union. At a time when international agreements are under attack, this book sheds light on the complex relationship between domestic politics and international economic cooperation, offering detailed evidence that international economic courts are effective at promoting interstate cooperation.

In *Teaching Expertise in Three Countries*, Akiko Hayashi shows how teachers from Japan, China, and the United States think about what it means to be an expert teacher. Based on interviews with teachers conducted over the span of fifteen years and videos taken in their classrooms, Hayashi gives us a valuable portrait of expert teachers in the making. While Hayashi's research uncovered cultural variations in the different national contexts, her analysis of how teachers adapted their pedagogy throughout their careers also revealed many cross-national similarities. Younger teachers often describe themselves as being in a rush, following scripts, and "talking too much," while experienced teachers describe themselves as being quieter, knowing children better, and being more present.

In 45 BCE, the Roman statesman Cicero fell to pieces when his beloved daughter, Tullia, died from complications of childbirth. But from the depths of despair, Cicero fought his way back. In an effort to cope with his loss, he wrote a consolation speech - not for others, as had always been done, but for himself. And it worked. Cicero's Consolation was something new in literature, equal parts philosophy and motivational speech. Drawing on the full range of Greek philosophy and Roman history, Cicero convinced himself that death and loss are part of life, and that if others have survived them, we can, too; resilience, endurance, and fortitude are the way forward.

Who doesn't worry sometimes that smart phones, the Internet, and TV are robbing us of time and preventing us from having a life? How can we make the most of our time on earth? In the first century AD, the Stoic philosopher Seneca the Younger offered one of the most famous answers to that question in his essay "On the Shortness of Life" - a work that has more to teach us today than ever before. In *How to Have a Life*, James Romm presents a vibrant new translation of Seneca's brilliant essay, plus two Senecan letters on the same theme, complete with the original Latin on facing pages and an inviting introduction.

**How to Say No: An Ancient Guide to the Art of Cynicism**

Diogenes / Usher, M. D. (trans.)

*Ancient Wisdom for Modern Readers* (Princeton U.P.)

2022 : 10 248 p. Hardback 9780691229850 ¥3,000

The Cynics were ancient Greek philosophers who stood athwart the flood of society's material excess, unexamined conventions, and even norms of politeness and thundered "No!" Diogenes, the most famous Cynic, wasn't shy about literally extending his middle finger to the world, expressing mock surprise that "most people go crazy over a finger." When asked why he was called Diogenes the Dog, he replied "because I fawn on those who give, I bark at those who don't, and I bite scoundrels." *How to Say No* is a delightful collection of brief ancient writings about Cynicism that captures all the outrageousness, wit, and wisdom of its remarkable cast of characters - from Diogenes in the fourth century BCE to the column-stander Symeon Stylites in late antiquity.

In the aftermath of the Second World War, French thinker and writer Georges Bataille forged a singular path through the moral and political impasses of his age. In 1946, animated by "a need to live events in an increasingly conscious way," and to reject any compartmentalization of intellectual life, Bataille founded the journal *Critique*. Adopting the format of the review essay, he surveyed the post-war cultural landscape while advancing his reflections on excess, non-knowledge, and the general economy. Focusing on literature as a mode of sovereign uselessness, he tackled prominent and divisive figures such as Henry Miller and Albert Camus.

**Gas Mask Nation: Visualizing Civil Air Defense in Wartime Japan**

Weisenfeld, Gennifer

(Univ. of Chicago Pr.)

2022 : 12 416 p. Hardback 9780226816449 ¥10,020

*Gas Mask Nation* explores the multilayered construction of an anxious yet perversely pleasurable visual culture of Japanese civil air defense - or *bōkū* - through a diverse range of artworks, photographs, films and newsreels, magazine illustrations, postcards, cartoons, advertising, fashion, everyday goods, government posters, and state propaganda. Gennifer Weisenfeld reveals the immersive aspects of this culture, in which Japan's imperial subjects were mobilized to regularly perform highly orchestrated civil air defense drills throughout the country.

**Japanese Perceptions of Papua New Guinea: War, Travel and the Reimagining of History**

Nishino, Ryota

*War, Culture and Society* (Bloomsbury Academic)

2022 : 10 272 p. Hardback 9781350139008 £85.00

*Japanese Perceptions of Papua New Guinea* exposes the interactions between two ostensibly opposing worlds: war and travel. While soldiers deployed to Eastern New Guinea during the Second World War recalled first-hand their experience of war, post-war tourists visited battle-sites, met locals, and drew their own conclusions about the Pacific island from the Japanese media. This book, in bringing travel and war closer together through a comparative analysis of veterans' memoirs and the records of postwar travelers, explores how individuals consume, create, and recreate war histories. As a result, Ryota Nishino reveals the extent to which the memory of defeat - for both soldiers and civilians alike - influenced the Japanese perceptions of Papua New Guinea and shaped future relations between the countries.

**Viruses: A Natural History**

Roossinck, Marilyn J.

*Lives of the Natural World* (Princeton U.P.)

2022 : 11 288 p. Hardback 9780691237596 ¥5,850

Using lively text, clear graphics, and beautiful imagery, *Viruses* examines all the aspects of viruses that are essential for understanding them - their diversity, behaviors, life cycles, and much more. Written in a nontechnical and easy-to-follow style, the book covers what viruses are and where they come from; how they transmit and evolve; the battle between viruses and hosts, including immunity and vaccination; viruses that are good for us; the critical role viruses play in the balance of earth's ecosystems; what makes a virus - including COVID-19 and influenza - become pandemic in plants or animals; and the cutting-edge research that is discovering thousands of new viruses. Each chapter concludes with stunningly illustrated profiles that highlight key viruses.
