2023 : 07 176 p. Hardback 9780252045127 US\$110.00 Paperback 9780252087264 US\$22.00

Films like *Shoplifters* and *After the Storm* have made Kore-eda Hirokazu one of the most acclaimed auteurs working today. Critics often see Kore-eda as a director steeped in the Japanese tradition defined by Yasujiro Ozu. Marc Yamada, however, views Kore-eda's work in relation to the same socioeconomic concerns explored by other contemporary international filmmakers. Yamada reveals that a type of excess, not the minimalism associated with traditional aesthetics, defines Kore-eda's trademark humanism. This excess manifests in small moments when a desire for human connection exceeds the logic of the institutions and policies formed by the neoliberal values that have shaped modern-day Japan.

*Art of Japan* presents one hundred highlights of Japanese art from the collection of the Philadelphia Museum of Art, dating from the Neolithic period to today. Among them are a temple and a teahouse, acquired in 1928, each the first of its type in an American museum. The collection is also notable for tea wares, particularly ceramics produced between the sixteenth and twenty-first centuries. The Edo and Meiji periods are especially well represented by a wide range of artworks that include calligraphy, paintings, and prints by such luminaries as Hon'ami Kōetsu (1558-1637), Ike Taiga (1723-1776), and Tsukioka Yoshitoshi (1839-1892).

### **Manga, Murder and Mystery: The Boy Detectives of Japan's Lost Generation**

Okabe, Mimi

(Bloomsbury Academic)

2023 : 07 216 p. Hardback 9781350325098 £85.00

*Manga, Murder and Mystery* answers these questions by exploring the figure of the shonen (boy) detective in commercially successful manga series such as *Detective Conan*, *The Case Files of Young Kindaichi*, *Death Note* and *Moriarty the Patriot*. The book explores how these popular works tackle the crisis of young adult culture within the socioeconomic climate of Japan's 'lost decade' and Heisei era, broadly speaking. Mimi Okabe shows how detective manga materialized in a nation undergoing a state of crisis and how the boy detective emerged as a site of national trauma to address perceived youth problems but in thematically different ways.

The West has a lot to learn from Japanese Marxist economics, which brings concepts like surplus value, class, the exploitation of labour and commodification to neoclassical economics. This classic work, following in the footsteps of Nobuo Okishio, Michio Morishima and Kozo Uno, provides a historical perspective on political economy and labour exploitation using extensive mathematical modelling. Suitable for students of economics, this is a new way to approach mainstream economics from a Marxist angle, and a fresh perspective on historical materialism.

*The Solidarity Economy* establishes how the formation of economic solidarities reveals that the boundaries between politics and economics are porous and structured such that politics, ideally a pure expression of ethics and values, is instead integrated with economic concerns. Identifying the power of contemporary social and solidarity movements, Laville examines the history of postcapitalist practices in which democratic demands invade the heart of the economy.

When Michael Lewis first met him, Sam Bankman-Fried was the world's youngest billionaire and crypto's Gatsby. CEOs, celebrities, and leaders of small countries all vied for his time and cash after he catapulted, practically overnight, onto the Forbes billionaire list. Who was this ruffled guy in cargo shorts and limp white socks, whose eyes twitched across Zoom meetings as he played video games on the side? In *Going Infinite* Lewis sets out to answer this question, taking readers into the mind of Bankman-Fried, whose rise and fall offers an education in high-frequency trading, cryptocurrencies, philanthropy, bankruptcy, and the justice system. Both psychological portrait and financial roller-coaster ride, *Going Infinite* is Michael Lewis at the top of his game, tracing the mind-bending trajectory of a character who never liked the rules and was allowed to live by his own - until it all came undone.

2023 : 08 256 p. Hardback 9780252045264 US\$110.00 Paperback 9780252087400 US\$28.00

Care activism challenges the stereotype of downtrodden migrant caregivers by showing that care workers have distinct ways of caring for themselves, for each other, and for the larger transnational community of care workers and their families. Ethel Tungohan illuminates how the goals and desires of migrant care worker activists goes beyond political considerations like policy changes and overturning power structures. Through practices of subversive friendships and being there for each other, care activism acts as an extension of the daily work that caregivers do, oftentimes also instilling practices of resistance and critical hope among care workers. At the same time, the communities created by care activism help migrant caregivers survive and even thrive in the face of arduous working and living conditions and the pains surrounding family separation.

### Japan's Nuclear Disaster and the Politics of Safety Governance

Koppenborg, Florentine

(Cornell U.P.)

2023 : 06 234 p. Hardback 9781501770043 US\$46.95

In *Japan's Nuclear Disaster and the Politics of Safety Governance*, Florentine Koppenborg argues that the regulatory reforms taken up in the wake of the Fukushima disaster on March 11, 2011, directly and indirectly raised the costs of nuclear power in Japan. The Nuclear Regulation Authority resisted capture by the nuclear industry and fundamentally altered the environment for nuclear policy implementation. Independent safety regulation changed state-business relations in the nuclear power domain from regulatory capture to top-down safety regulation, which raised technical safety costs for electric utilities. Furthermore, the safety agency's extended emergency preparedness regulations expanded the allegorical backyard of NIMBY demonstrations. Antinuclear protests, mainly lawsuits challenging restarts, incurred additional social acceptance costs. Increasing costs undermined pronuclear actors' ability to implement nuclear power policy and caused a rift inside the "nuclear village." Small nuclear safety administration reforms were, in fact, game changers for nuclear power politics in Japan.

**What Women Want: Gender and Voting in Britain, Japan and the United States**

Steel, Gill

(U. of Michigan Pr.)

2022 : 03 296 p. Hardback 9780472132959 US\$80.00

*What Women Want* analyzes decades of voting preferences, values, and policy preferences to debunk some of the media and academic myths about gender gaps in voting and policy preferences. Findings show that no single theory explains when differences in women's and men's voting preferences emerge, when they do not, or when changes - or the lack thereof - occur over time. Steel extends existing theories to create a broader framework for thinking about gender and voting behavior to provide more analytical purchase in understanding gender and its varying effects on individual voters' preferences. She incorporates the long-term effects of party identification and class politics on political decision-making, particularly in how they influence preferences on social provision and on expectations of the state. She also points to the importance of symbolic politics.

Parks, Thomas

(Bloomsbury Academic)

2023 : 07 264 p. Hardback 9781350270787 £85.00

This book argues that Southeast Asia is emerging as an open, autonomous region, where small and middle powers can maintain their sovereignty and shape the regional order. Despite new superpower pressures, the region is moving towards a multi-polar order, with greater agency for Southeast Asian countries. The key to Southeast Asia's future may be other external powers - particularly Japan, Australia, India, and Europe - who can provide ASEAN governments with more diverse partnerships, enabling them to avoid the bipolar blocs of superpower rivalries. The book argues that external partners are helping to shape the geopolitical order by supporting ASEAN leadership and diluting the influence of great powers.

2023 : 04 254 p. Hardback 9780252044922 US\$110.00 Paperback 9780252087073 US\$28.00

As the United States transformed into an industrial superpower, American socialists faced the vexing question of how to approach race. Lorenzo Costaguta balances intellectual and institutional history to illuminate the clash between two major points of view. On one side, some believed labor should accept and apply the ascendant tenets of scientific theories of race. But others stood with International Workingmen's Association leaders J. P. McDonnell and F. A. Sorge in rejecting the idea that racial and ethnic division influenced worker-employer relations, arguing instead that class played the preeminent role. Costaguta charts the socialist movement's journey through the conflict and down a path that ultimately abandoned scientific racism in favor of an internationalist class-focused American socialism.

An international group of contributors make the case that these five factors draw upon a longstanding influence of naval power on regional dynamics and impact the extent to which different states in the region use naval power: the capacity to exert control over sea-lanes, the capacity to deploy a nuclear deterrent at sea, the capacity to implement the law of the sea in an advantageous way, the ability to control marine resources, and the capacity for technological innovation.

This memory loop is constructed through the mediation and remediation of war narratives via transnational sites of memory such as international tribunals, migrant memoirs, photographs, and films.

There is clearly a positive fascination: various bestsellers entitled Talmud are found in vending machines and public schools, while private 'Jewish education' institutions have opened across South Korea, claiming to improve children's IQ. People can stay at the Talmud Business Hotel in Taiwan, or attend Chinese centres for Jewish Studies with academics who have never met a Jew. There is a legend that Japanese people are a Lost Tribe of Israel, and 'Anne's day', named after Anne Frank, is a euphemism for menstruation. Yet the region also shows some of the world's highest rates of antisemitism, manifesting in disturbing ways: Taiwan's concentration camp-themed restaurant, or South Korea's 'Adolf Hitler Techno Bar & Cocktail Show'. By integrating scholarship on antisemitism, East Asian Studies and cognitive science, Schilling uncovers antisemitism's global, sometimes dualistic nature; not Western, and always persistent. He offers ground-breaking insight, redefining how we understand East Asia, antisemitism, and Judaism as a globalised religion.
