Bookishness: Loving Books in a Digital Age

Pressman, Jessica

Literature Now (Columbia U.P.)

2020 : 07 288 Hardback 9780231195126 US\$90.00 Paperback 9780231195133 US\$30.00

In *Bookishness*, Jessica Pressman examines the new status of the book as object and symbol. She explores the rise of “bookishness” as an identity and an aesthetic strategy that proliferates from store-window décor to experimental writing. Ranging from literature to kitsch objects, stop-motion animation films to book design, Pressman considers the multivalent meanings of books in contemporary culture. Books can represent shelter from - or a weapon against - the dangers of the digital; they can act as memorials and express a sense of loss.

Sachiko: A Novel

Endo, Shusaku / Gessel, Van C. (trans.)

Weatherhead Books on Asia (Columbia U.P.)

2020 : 08 464 p. Hardback 9780231197304 US\$95.00 Paperback 9780231197311 US\$28.00

In the 1930s, two young Japanese Christians, Sachiko and Shūhei, are free to play with American children in their neighborhood. But life becomes increasingly difficult for them and other Christians after Japan launches wars of aggression. Meanwhile, a Polish Franciscan priest and former missionary in Nagasaki, Father Maximilian Kolbe, is arrested after returning to his homeland. Endō alternates scenes between Nagasaki - where the growing love between Sachiko and Shūhei is imperiled by mounting persecution - and Auschwitz, where the priest has been sent. Shūhei's dilemma deepens when he faces conscription into the Japanese military, conflicting with the Christian belief that killing is a sin. With the A-bomb attack on Nagasaki looming in the distance, Endō depicts ordinary people trying to live lives of faith in a wartime situation that renders daily life increasingly unbearable.

Development of Linguistic Linked Open Data Resources for Collaborative Data-Intensive Research in the Language Sciences

Pareja-Lora, Antonio et al. (ed.)

(MIT Pr.)

2020 : 01 272 p. Paperback 9780262536257 US\$40.00

This volume examines the challenges inherent in making diverse data in linguistics and the language sciences open, distributed, integrated, and accessible, thus fostering wide data sharing and collaboration. It is unique in integrating the perspectives of language researchers and technical LOD (linked open data) researchers. Reporting on both active research needs in the field of language acquisition and technical advances in the development of data interoperability, the book demonstrates the advantages of an international infrastructure for scholarship in the field of language sciences.

Language Acquisition and Development: A Generative Introduction

Becker, Misha & Deen, Kamil Ud

(MIT Pr.)

2020 : 03 336 p. Hardback 9780262043588 US\$55.00

How children acquire language so quickly, easily, and uniformly is one of the great mysteries of the human experience. The theory of Universal Grammar suggests that one reason for the relative ease of early language acquisition is that children are born with a predisposition to create a grammar. This textbook offers an introduction to the study of children's acquisition and development of language from a generative/universal grammar-based theoretical perspective, providing comprehensive coverage of children's acquisition while presenting core concepts crucial to understanding generative linguistics more broadly.

Probes and Their Horizons

Keine, Stefan

Linguistic Inquiry Monographs (MIT Pr.)

2020 : 02 380 p. Hardback 9780262043618 US\$110.00 Paperback 9780262538275 US\$55.00

In this book, Stefan Keine investigates in detail "selective opacity" - configurations in which syntactic domains are opaque to some processes but transparent to others - and develops a comprehensive theory of these syntactic configurations within a contemporary Minimalist framework. Although such configurations have traditionally been analyzed in terms of restrictions on possible sequences of movement steps, Keine finds that analogous restrictions govern long-distance dependencies that do not involve movement. He argues that the phenomenon is more widespread and abstract than previously assumed. He proposes a new approach to such effects, according to which probes that initiate the operation Agree are subject to "horizons," which terminate their searches.

Climb: Leaving Safe and Finding Strength on 100 Summits in Japan

Spann, Susan

Globe Pequot / Prometheus (Rowman & Littlefield)

2020 : 06 256 p. Hardback 9781633885929 US\$26.95

The inspiring memoir of a middle-aged woman who challenged herself to climb one hundred Japanese mountains in a single year, even after an aggressive cancer threatened to derail her dream. After more than forty years of living "safe and scared," California attorney and mystery author Susan Spann decided to break free by climbing one hundred of Japan's most famous mountains, inspired by a classic list of *hyakumeizan* peaks. But when an unexpected cancer diagnosis forced her to confront her deepest fears, the mountains of Japan became the setting for an even more transformative journey from pain and fear to a new life fueled by hope, confidence, and strength. This immersive, inspiring, and witty page-turner captures the terrifying lows and breathtaking highs of a woman's journey from timidity to confidence, cancer to healing, and regret to joy, as she breaks the mental and physical chains that once prevented her from living out her dreams.

Davis, Julie Nelson

(Reaktion Books)

2020 : 06 296 p. 114 illus., 66 in colour Paperback 9781789142358 £25.00

Japanese artist Kitagawa Utamaro (1753-1806) was one of the most influential artists working in the genre of ukiyo-e, 'pictures of the floating world', in late eighteenth-century Japan, and was widely appreciated for his prints of beautiful women. In this book, Julie Nelson Davis draws on a wide range of period sources, makes a close study of selected print sets and reinterprets Utamaro in the context of his times. Offering a new approach to issues of the status of the artist and the construction of gender, identity, sexuality and celebrity in the Edo period, and now in an updated edition containing a new preface and many new images, this book is a significant contribution to the field, and will be a key work for readers interested in Japanese arts and cultures.

Economic Dynamics in Discrete Time. 2nd ed

Miao, Jianjun

(MIT Pr.)

2020 : 02 848 p. Hardback 9780262043625 US\$85.00

This book offers a unified, comprehensive, and up-to-date treatment of analytical and numerical tools for solving dynamic economic problems. The focus is on introducing recursive methods - an important part of every economist's set of tools - and readers will learn to apply recursive methods to a variety of dynamic economic problems. The book is notable for its combination of theoretical foundations and numerical methods. Each topic is first described in theoretical terms, with explicit definitions and rigorous proofs; numerical methods and computer codes to implement these methods follow. Drawing on the latest research, the book covers such cutting-edge topics as asset price bubbles, recursive utility, robust control, policy analysis in dynamic New Keynesian models with the zero lower bound on interest rates, and Bayesian estimation of dynamic stochastic general equilibrium (DSGE) models.

Dynamism: The Values That Drive Innovation, Job Satisfaction, and Economic Growth

Phelps, Edmund et al.

(Harvard U.P.)

2020 : 05 256 p. Hardback 9780674244696 US\$35.00

Nobel Laureate Edmund Phelps has long argued that the high level of innovation in the lead nations of the West was never a result of scientific discoveries plus entrepreneurship, as Schumpeter thought. Rather, modern values - particularly the individualism, vitalism, and self-expression prevailing among the people - fueled the dynamism needed for widespread, indigenous innovation. Yet finding links between nations' values and their dynamism was a daunting task. Now, in *Dynamism*, Phelps and a trio of coauthors take it on. Phelps, Raicho Bojilov, Hian Teck Hoon, and Gyfi Zoega find evidence that differences in nations' values matter - and quite a lot. It is no accident that the most innovative countries in the West were rich in values fueling dynamism. Nor is it an accident that economic dynamism in the United States, Britain, and France has suffered as state-centered and communitarian values have moved to the fore.

Bruntz, Courtney & Schedneck, Brooke (ed.)

Contemporary Buddhism (Univ. of Hawaii Pr.)

2020 : 03 266 p. Hardback 9780824881184 US\$68.00

Following an introduction that offers the first theoretical understanding of tourism from a Buddhist studies' perspective, early chapters discuss the ways Buddhists and non-Buddhists imagine concepts and places related to the religion. Case studies highlight Buddhist peace in India, Buddhist heavens and hells in Singapore, Thai temple space, and the future Buddha Maitreya in China. Buddhist tourism's connections to the state, market, and new technologies are explored in chapters on Indian package tours for pilgrims, thematic Buddhist tourism in Cambodia, the technological innovations of Buddhist temples in China, and the promotion of pilgrimage sites in Japan. Contributors then situate the financial concerns of Chinese temples, speed dating in temples in Japan, and the diffuse and pervasive nature of Buddhism for tourism promotion in Ladakh, India.

Carbon Captured: How Business and Labor Control Climate Politics

Mildenberger, Matto

American and Comparative Environmental Policy (MIT Pr.)

2020 : 02 368 p. Paperback 9780262538251 US\$35.00

ノルウェー、アメリカ、オーストラリアの気候変動政策の歴史を詳述。ドイツ、日本、イギリス、カナダの政策にも言及。

Mildenberger introduces the concept of double representation - when carbon polluters enjoy political representation on both the left (through industrial unions fearful of job loss) and the right (through industrial business associations fighting policy costs) - and argues that different climate policy approaches can be explained by the interaction of climate policy preferences and domestic institutions. He illustrates his theory with detailed histories of climate politics in Norway, the United States, and Australia, along with briefer discussions of policies in Germany, Japan, the United Kingdom, and Canada. He shows that Norway systematically shielded politically connected industrial polluters from costs beginning with its pioneering carbon tax; the United States, after the failure of carbon reduction legislation, finally acted on climate reform through a series of Obama administration executive actions; and Australia's Labor and Green parties enacted an emissions trading scheme, which was subsequently repealed by a conservative Liberal party government.

Living Transnationally between Japan and Brazil: Routes beyond Roots

LeBaron von Baeyer, Sarah A.

New Studies in Modern Japan (Lexington Books)

2019 : 11 258 p. Hardback 9781498580366 US\$95.00

Based on over two years of participant-observation in labor brokerage firms, factories, schools, churches, and people's homes in Japan and Brazil, Sarah LeBaron von Baeyer presents an ethnographic portrait of what it means in practice to "live transnationally," that is, to contend with the social, institutional, and aspirational landscapes bridging different national settings. Rather than view Japanese-Brazilian labor migrants and their families as somehow lost or caught between cultures, she demonstrates how they in fact find creative and flexible ways of belonging to multiple places at once. At the same time, the author pays close attention to the various constraints and possibilities that people face as they navigate other dimensions of their lives besides ethnic or national identity, namely, family, gender, class, age, work, education, and religion.

Borstelmann, Thomas

(Columbia U.P.)

2020 : 05 272 Hardback 9780231193528 US\$32.00

Just Like Us is a pathbreaking exploration of what foreignness has meant across American history. Thomas Borstelmann traces American ambivalence about non-Americans, identifying a paradoxical perception of foreigners as suspiciously different yet fundamentally sharing American values beneath the layers of culture. Considering race and religion, notions of the American way of life, attitudes toward immigrants, competition with communism, Americans abroad, and the subversive power of American culture, he offers a surprisingly optimistic account of the acceptance of difference. Borstelmann contends that increasing contact with peoples around the globe during the Cold War encouraged mainstream society to grow steadily more inclusive. In a time of resurgent nativism and xenophobia, *Just Like Us* provides a reflective, urgent examination of how Americans have conceived of foreignness and their own exceptionalism throughout the nation's history.

NOlympians: Inside the Fight Against Capitalist Mega-Sports in Los Angeles, Tokyo and Beyond investigates the intersection of the global rise of anti-Olympics activism and the declining popularity of hosting of the Games. The Olympics were once buoyed by myths of luminous prosperity and upticks in tourism and jobs, but in recent years these assurances have been debunked. Now more than ever, it's clear that the Olympics have transmogrified into a political-economic juggernaut that arrives with displacement, expanded policing, and anti-democratic backroom deals. Jules Boykoff - a former professional soccer player who represented the US Olympic soccer team - zooms in on Los Angeles, where the Democratic Socialists of America have launched the NOlympics LA campaign ahead of the 2028 Summer Games. Boykoff shows how DSA-LA's anti-Olympics activism fits with the resurgence of socialism in the US and beyond.

Finchelstein, Federico

(U. of California Pr.)

2020 : 04 152 p. Hardback 9780520346710 US\$19.95

In this short companion to his book *From Fascism to Populism in History*, world-renowned historian Federico Finchelstein explains why fascists regarded simple and often hateful lies as truth, and why so many of their followers believed the falsehoods. Throughout the history of the twentieth century, many supporters of fascist ideologies regarded political lies as truth incarnated in their leader. From Hitler to Mussolini, fascist leaders capitalized on lies as the base of their power and popular sovereignty. This history continues in the present, when lies again seem to increasingly replace empirical truth. Now that actual news is presented as “fake news” and false news becomes government policy, *A Brief History of Fascist Lies* urges us to remember that the current talk of “post-truth” has a long political and intellectual lineage that we cannot ignore.

In this book, Susan Schuppli introduces a new operative concept: material witness, an exploration of the evidential role of matter as both registering external events and exposing the practices and procedures that enable matter to bear witness. Organized in the format of a trial, *Material Witness* moves through a series of cases that provide insight into the ways in which materials become contested agents of dispute around which stake holders gather. These cases include an extraordinary videotape documenting the massacre at Izbica, Kosovo, used as war crimes evidence against Slobodan Milošević; the telephonic transmission of an iconic photograph of a South Vietnamese girl fleeing an accidental napalm attack; radioactive contamination discovered in Canada's coastal waters five years after the accident at Fukushima Daiichi; and the ecological media or "disaster film" produced by the Deep Water Horizon oil spill in the Gulf of Mexico.

Christian Sorcerers on Trial offers annotated translations of a range of sources on this sensational event, from the 1827 arrest of the alleged Christians through the case's afterlife. The protagonists' testimonies relate with striking detail their life histories, practices, and motivations. The record of deliberations in Edo and communications between Osaka and Edo officials illuminate the operation of the Tokugawa system of criminal justice. Retellings of the incident show how the story was transmitted and received. Translated and put in context by Fumiko Miyazaki, Kate Wildman Nakai, and Mark Teeuwen, the sources provide students and scholars alike with an extraordinarily rich picture of late Edo social life, religious practices, and judicial procedures.

Zen Terror in Prewar Japan: Portrait of an Assassin

Victoria, Brian Daizen

Asian Voices (Rowman & Littlefield)

2020 : 02 392 p. Hardback 9781538131664 US\$34.00

Victoria provides a detailed introduction to the religious as well as political significance of the group's terrorist beliefs and acts, focusing especially on the life and times of the band's leader, Inoue Nissō. A deeply troubled youth, Inoue became a spy in Manchuria for the Japanese Army in 1909, where he encountered Zen for the first time. When he returned to Japan in 1921, he determined to resolve his deep spiritual discontent through meditation practice, which culminated in an enlightenment experience that resolved his long-term doubts. After engaging in "post-enlightenment training" under the guidance of Rinzaï Zen master Yamamoto Gempō, Inoue began a program of training the "patriotic youth" who formed the nucleus of his terrorist band.

A Beginner's Guide to Japan: Observations and Provocations

Iyer, Pico

(Bloomsbury Trade)

2020 : 04 240 p. Paperback 9781526611512 £8.99

How does a sushi bar explain a Japanese poem? Why do Japanese couples plan matching outfits for their honeymoon? Why are so many things in Japan the opposite of what we expect? After thirty-two years in Japan, Pico Iyer knows the country as few others can. In *A Beginner's Guide to Japan*, he dashes from baseball games to love-hotels and from shopping malls to zen temple gardens to find fresh ways of illuminating his adopted home. Playful and surreptitiously profound, this is a guidebook to a Japan few have ever seen before.

Fujiwara, Aya & Marples, David R. (ed.)

(Ibidem Pr.)

2020 : 04 302 p. Paperback 9783838213989 US\$46.00

75 years after the United States dropped the world's first atomic bombs on the Japanese cities of Hiroshima and Nagasaki, a group of international scholars offers new perspectives on this event and the history, development, and portrayal of the utilization of atomic energy: in military and civilian industries, civil nuclear power, literature and film, and the contemporary world. What lessons have we learned since the end of the Second World War? Can we avoid disasters such as Chernobyl and Fukushima? Have we learned to live with man-made nuclear power in the 21st century?

Japan's New Regional Reality: Geoeconomic Strategy in the Asia-Pacific

Katada, Saori N.

Contemporary Asia in the World (Columbia U.P.)

2020 : 07 336 p. Hardback 9780231190725 US\$140.00 Paperback 9780231190732 US\$35.00

Japan's New Regional Reality offers a comprehensive analysis of Japan's geoeconomic strategy that reveals the country's role in shaping regional economic order in the Asia-Pacific. Saori N. Katada explains Japanese foreign economic policy in light of both international and domestic dynamics. She points out the hurdles to implementing a state-led liberal strategy, detailing how domestic political and institutional changes have been much slower and stickier than the changing regional economics. Katada highlights state-market relations and shows how big businesses have responded to the country's interventionist policies. The book covers a wide range of economic issues including trade, investment, finance, currency, and foreign aid.

The Cognitive Neurosciences. 6th ed

Poeppel, David et al. (ed.)

(MIT Pr.)

2020 : 04 1152 p. Hardback 9780262043250 US\$225.00

This sixth edition treats such foundational topics as memory, attention, and language, as well as other areas, including computational models of cognition, reward and decision making, social neuroscience, scientific ethics, and methods advances. Over the last twenty-five years, the cognitive neurosciences have seen the development of sophisticated tools and methods, including computational approaches that generate enormous data sets. This volume deploys these exciting new instruments but also emphasizes the value of theory, behavior, observation, and other time-tested scientific habits.

The Alchemy of Disease: How Chemicals and Toxins Cause Cancer and Other Illnesses

Whysner, John

(Columbia U.P.)

2020 : 06 352 p. Hardback 9780231191661 US\$35.00

In *The Alchemy of Disease*, John Whysner offers an accessible and compelling history of toxicology and its key findings. He details the experiments and discoveries that revealed the causal connections between chemical exposures and diseases. Balancing clear accounts of groundbreaking science with human drama and public-policy relevance, Whysner describes key moments in the development of toxicology and their thorny social and political implications. The book features discussions of toxicological problems past and present, including DDT, cigarettes and other carcinogens, lead poisoning, fossil fuels, chemical warfare, pharmaceuticals - including opioids - and the efficacy of animal testing.

The Chile Pepper in China: A Cultural Biography

Dott, Brian R.

Arts and Traditions of the Table: Perspectives on Culinary History (Columbia U.P.)

2020 : 04 296 Hardback 9780231195324 US\$32.00

Brian R. Dott explores how the nonnative chile went from obscurity to ubiquity in China, influencing not just cuisine but also medicine, language, and cultural identity. He details how its versatility became essential to a variety of regional cuisines and swayed both elite and popular medical and healing practices. Dott tracks the cultural meaning of the chile across a wide swath of literary texts and artworks, revealing how the spread of chiles fundamentally altered the meaning of the term spicy. He emphasizes the intersection between food and gender, tracing the chile as a symbol for both male virility and female passion.

Prothero, Donald R.

(Columbia U.P.)

2020 : 12 384 p. Hardback 9780231190367 US\$35.00

In *The Story of Evolution in 25 Discoveries*, Donald R. Prothero explores the most fascinating breakthroughs in piecing together the evidence for evolution. In twenty-five vignettes, he recounts the dramatic stories of the people who made crucial discoveries, placing each moment in the context of what it represented for the progress of science. He tackles topics like what it means to see evolution in action and the distance between species in space and time, following figures from Darwin to lesser-known researchers as they unlock the mysteries of the fossil record, the earth, and the universe.

How to Grow a Robot: Developing Human-Friendly, Social AI

Lee, Mark H.

The MIT Press (MIT Pr.)

2020 : 04 384 Hardback 9780262043731 US\$29.95

Developments in artificial intelligence - notably Deep Learning - are widely seen as the foundation on which our robot future will be built. These advances have already brought us self-driving cars and chess match - winning algorithms. But, Lee writes, we need robots that are perceptive, animated, and responsive - more like humans and less like computers, more social than machine-like, and more playful and less programmed. The way to achieve this, he argues, is to "grow" a robot so that it learns from experience - just as infants do.
